## **Abstracts**

The counterfeit money detection market is expected to reach USD 3.11 billion by 2020, growing at a CAGR of 6.9% between 2015 and 2020. Various government enforcements to prevent the circulation of fake currency notes are driving the growth of the counterfeit money detection market.

The counterfeit money detection market for the transportation industry is expected to grow at the highest rate during the forecast period 2015–2020

Counterfeiting is considered as a risk in the transportation industries because the increasing deployment of kiosks and vending machines at various transportation facilities such as airports and railway stations may create chances of circulation of fake notes. This is the major driving factor for the demand of counterfeit money detectors in the transportation industry.

North America is expected to hold the largest market share during the forecast period
