Abstracts

“Critical communication market to grow at CAGR of 7.4% from 2019 to 2024.”

The critical communication market is expected to grow from USD 13.9 billion in 2019 to USD 19.8 billion by 2024, at a CAGR of 7.4%. Advanced features of critical communication network, high demand for critical communication solutions from diverse industries such as public safety, transportation, and medical, and increasing need to modernize old equipment are the major driving factors for the market growth during the forecast period. However, budget constraints toward procurement and interoperability issues are likely to hinder the growth of the critical communication market in the future.

“LMR technology to hold the largest market share during the forecast period.”

Land mobile radios (LMRs) is a wireless communication system intended for use by terrestrial users in vehicles or on foot. These systems are used widely by first responders such as police, ambulance, and fire services. Analog systems make good use of bandwidth and are user-friendly. These devices can be operated easily, even by firefighters wearing gloves.

Earlier, analog LMR systems used amplitude modulation (AM) signals, which worked like AM radio stations. For several decades, analog LMRs have used standard

frequency modulation (FM) as they are less susceptible to noise interference. These are some of the factors fueling the growth of the critical communication market for LMR technology during the forecast period.

“Transportation to grow at the highest CAGR during the forecast period.”

The transportation vertical comprises buses, trams, metros, railways, and airplanes, among others. Communication plays a vital role in a transportation system, especially in air transport, where information about the arrival and departure of flights is conveyed and interoperated by the security personnel. Modern transport facilities, such as highway, public transportation, and port & airport facilities, have provided increased travel opportunities and greater choices to travelers. Similarly, critical communication is used in road transport for maintaining coordination and safety. In the transportation sector, TETRA-based critical communication network is deployed widely because of its proven reliability.

“Hardware offering to hold the largest market share during the forecast period.”

Hardware offerings are the backbone of any critical communications network system. A few of the vital components forming a critical communications system are command & control systems, infrastructure equipment, and end-user devices. Infrastructure equipment is the most important constituent of a critical communications network. Thus, the hardware segment is expected to hold a larger share of the critical communication market because of the rising demand from the ongoing as well as new deployment of critical communication networks primarily in North America, APAC, and Europe.

“APAC to record the highest growth rate during the forecast period.”

APAC is a potential market for critical communication systems because of the strong government focus on establishing robust communication infrastructure. Governments are implementing critical communication solutions such as networks, surveillance & biometric authentication systems, and other screening & scanning systems for emergency and disaster management.

India is among the fastest-growing nations in the world in terms of technology; therefore, installing critical communication networks in the country is a necessity to serve its ever-growing population. Moreover, to combat the ever-growing incidents of terrorism and natural disasters, countries in APAC are increasing their spending on the adoption of security solutions. In recent years, APAC has witnessed tremendous

economic growth, political transformation, and social change; this is expected to increase the demand for critical communication in this region. Countries such as China, India, Australia, Singapore, and Malaysia are expected to witness tremendous growth in the critical communication market.

In the process of determining and verifying the market sizes for several segments and subsegments gathered through secondary research, extensive primary interviews have been conducted with people holding key positions across several regions. The breakup of the profiles of primary participants has been given below:

By Company Type: Tier 1 = 30%, Tier 2 = 25%, and Tier 3 = 45%

By Designation: C-Level Executives = 35%, Directors = 45%, and Others = 20%

By Region: North America = 45%, Europe = 15%, APAC = 35%, and RoW = 5%

Key players in the market include Motorola Solutions (US), Ericsson (Sweden), Nokia (Finland), Huawei (China), AT&T (US), Hariss (US), ZTE (China), Cobham Wireless (UK), Inmarsat (UK), Hytera (China), JVCKENWOOD Corporation (Japan), Mentura Group (Finland), Tait Communications (New Zealand), Telestra (Australia), Ascom (Switzerland), Zenitel (Belgium), Leonardo (Italy), Secure Land Communications (France), and Simoco Wireless Solutions (UK).

Research Coverage:

The report defines, describes, and forecasts the critical communication market based on offering, technology, end-use vertical, and geography. It provides detailed information regarding the major factors influencing the growth of the critical communication market (drivers, restraints, opportunities, and challenges). It also analyzes the competitive developments—such as joint ventures, collaborations, agreements, contracts, partnerships, mergers and acquisitions, and product launches—carried out by key players to grow in the market.

Reasons to Buy the Report:

Illustrative segmentation, analysis, and forecast pertaining to the critical communication market based on offering, technology, end-use vertical, and geography have been conducted to provide an overall view of the critical

communication market.

Major drivers, restraints, opportunities, and challenges for the critical communication market have been detailed in this report.

The report includes a detailed competitive landscape of the key players in the market and their ranking.

Contents

1 INTRODUCTION

- 1.1 study objectives
- 1.2 definition
- 1.3 Study Scope
 - 1.3.1 Years considered
- 1.4 currency
- 1.5 limitations
- 1.6 stakeholders

2 RESEARCH METHODOLOGY

2.1 RESEARCH DATA

- 2.1.1 Secondary Data
 - 2.1.1.1 Key data from secondary sources
- 2.1.2 Primary Data
 - 2.1.2.1 Key data from primary sources
 - 2.1.2.2 Breakdown of primaries
- 2.2 Market size estimation
 - 2.2.1 bottom-up approach
 - 2.2.1.1 Approach to capture market size by bottom-up analysis
 - 2.2.2 Top-Down approach
 - 2.2.2.1 Approach to capture market size by top-down analysis
- 2.3 market Breakdown and data triangulation
- 2.4 research Assumptions

3 EXECUTIVE SUMMARY

4 PREMIUM INSIGHTS

- 4.1 attractive opportunities in overall critical communication market
- 4.2 critical communication market, By technology
- 4.3 critical communication market, By vertical
- 4.4 critical communication market in APAC, By vertical and country
- 4.5 critical communication market, by geography

5 MARKET OVERVIEW

Critical Communication Market by Offering (Hardware, Services), Technology (Land Mobile Radio, Long-Term Evolu...

5.1 introduction

5.2 market dynamics

5.2.1 drivers

5.2.1.1 High demand for critical communication solutions from diverse industries such as public safety, transportation, and medical

5.2.1.2 Advanced features of critical communication networks

5.2.1.3 Increased need to modernize old equipment

5.2.2 Restraints

5.2.2.1 Limited availability of bandwidth

5.2.2.2 Increased complexity of networks and systems due to multiple communication standards

5.2.3 OPPORTUNITIES

5.2.3.1 Need for reliable and high-quality public safety communication systems

5.2.3.2 Standardization of infrastructure platforms

5.2.4 challenges

5.2.4.1 Budget constraints toward procurement

5.2.4.2 Interoperability issues

6 CRITICAL COMMUNICATION MARKET, BY OFFERING

6.1 INTRODUCTION

6.2 Hardware

6.2.1 command and control systems

6.2.1.1 APAC to be fastest-growing region in critical communication market for command and control systems during forecast period

6.2.2 INFRASTRUCTURE equipment

6.2.2.1 North America to hold substantial share of critical communication market for infrastructure equipment during forecast period

6.2.3 end-use devices

6.2.3.1 Critical communication market for end-use devices to grow at highest growth rate during forecast period

6.3 services

6.3.1 Consulting services

6.3.1.1 Consulting services to witness significant growth in critical communication market during forecast period

6.3.2 integration Services

6.3.2.1 Technological advancements to boost demand for integration services during forecast period

6.3.3 Maintenance and support Services

6.3.3.1 Maintenance and support services to dominate the critical communication market during forecast period

7 CRITICAL COMMUNICATION MARKET, BY TECHNOLOGY

7.1 INTRODUCTION

7.2 Land Mobile Radio (LMR)

7.2.1 LMR TECHNOLOGY-BASED CRITICAL COMMUNICATION SOLUTIONS TO ACCOUNT FOR LARGER MARKET SHARE DURING 2019–2024

7.2.2 TEtra/p25

7.2.2.1 TERA/P25 LMR technology to record highest CAGR in critical communication market during forecast period

7.2.3 Analog

7.2.3.1 Analog technology accounted for largest share of critical communication market for LMR in 2018

7.2.4 others

7.3 Long-term evolution (LTE)

7.3.1 LTE technology to witness highest CAGR in critical communication market during forecast period

8 CRITICAL COMMUNICATION MARKET, BY VERTICAL

8.1 Introduction

8.2 public safety

8.2.1 Public safety vertical to witness highest demand for critical communication solutions during forecast period

8.3 transportation

8.3.1 Transportation vertical to witness highest CAGR in critical communication market from 2019 to 2024

8.4 utilities

8.4.1 Need for robust communication in utilities vertical to propel critical communication market growth during forecast period

8.5 mining

8.5.1 APAC to record highest CAGR in critical communication market for mining vertical during forecast period

8.6 Others

9 GEOGRAPHIC ANALYSIS

9.1 introduction

9.2 north america

9.2.1 US

9.2.1.1 US to hold major share of critical communication market in North America during forecast period

9.2.2 Canada

9.2.2.1 Canadian critical communication market growth is accelerated by huge investments by government

9.2.3 mexico

9.2.3.1 LMR technology to capture major share of critical communication market in Mexico during forecast period

9.3 europe

9.3.1 Uk

9.3.1.1 UK to lead European critical communication market during forecast period

9.3.2 germany

9.3.2.1 Germany to record highest CAGR in critical communication market in Europe during forecast period

9.3.3 france

9.3.3.1 LTE technology to witness higher CAGR in French critical communication market during 2019–2024

9.3.4 spain

9.3.4.1 Technological advancements and concerns of safety and security to surge demand for critical communication solutions in Spain in coming years

9.3.5 rest of europe

9.3.5.1 Strong government support for development of advanced critical communication systems boost critical communication market growth in Rest of Europe

9.4 asia pacific (APAC)

9.4.1 China

9.4.1.1 China to hold major share of critical communication market in APAC during forecast period

9.4.2 japan

9.4.2.1 Critical communication market in Japan is driven by increasing preference for smart home technologies

9.4.3 india

9.4.3.1 India to witness highest CAGR in critical communication market in APAC during forecast period

9.4.4 South korea

9.4.4.1 LTE technology to register highest CAGR in critical communication market in

South Korea during forecast period

9.4.5 rest of apac

9.4.5.1 LMR technology to hold significant share of critical communication market in

Rest of APAC during forecast period

9.5 rest of the world (row)

9.5.1 south america

9.5.1.1 South America to register higher CAGR in critical communication market in

RoW during forecast period

9.5.2 middle east and africa

9.5.2.1 Middle East and Africa to hold major share of critical communication market in

RoW during forecast period

10 COMPETITIVE LANDSCAPE

10.1 Overview

10.2 ranking Analysis of key players in critical communication market

10.3 competitive leadership mapping

10.3.1 visionary leaders

10.3.2 dynamic differentiators

10.3.3 innovators

10.3.4 emerging companies

10.4 STRENGTH OF PRODUCT PORTFOLIO (25 COMPANIES)

10.5 business strategy excellence (25 COMPANIES)

10.6 competitive situations and trends

10.6.1 product launches and developments

10.6.2 AGREEMENTS, PARTNERSHIPS, contracts, COLLABORATIONS

10.6.3 acquisitions

10.6.4 Expansions

11 COMPANY PROFILES

(Business Overview, Products, Solutions, and Services Offered, Recent Developments, SWOT Analysis, and MnM View)*

11.1 INTRODUCTION

11.2 key players

11.2.1 Motorola solutions

11.2.2 Nokia

11.2.3 Harris

11.2.4 AT&T

- 11.2.5 Hytera
- 11.2.6 Ericsson
- 11.2.7 ZTE
- 11.2.8 Huawei
- 11.2.9 cobham wireless
- 11.2.10 Ascom
- 11.3 Other KEY players
 - 11.3.1 Leonardo
 - 11.3.2 Mentura Group
 - 11.3.3 Inmarsat
 - 11.3.4 Zenitel
 - 11.3.5 Telstra
 - 11.3.6 JVCkenwood corporation
 - 11.3.7 tait communications
 - 11.3.8 secure land communications (airbus)
 - 11.3.9 simoco wireless solutions

*Details on Business Overview, Products, Solutions, and Services Offered, Recent Developments, SWOT Analysis, and MnM View might not be captured in case of unlisted companies.
