“Growing construction industry, new orders in manufacturing industries and public expenditure from government to drive the market for cutting equipment, accessories, and consumables across the globe”

The global market for cutting equipment, accessories, and consumables is projected to grow from USD 6.67 billion in 2016 to USD 8.27 billion by 2021, at a CAGR of 4.40%. Growth in the construction industry throughout the world, uptick of consumer spending, full capacity utilization of the manufacturers, and increase in automobile sales have played a huge role in providing the necessary momentum to the cutting equipment, accessories, and consumables market after the economic slowdown.

“The mechanized cutting equipment segment holds a large market share and is expected to gain maximum traction during the forecast period”

The mechanized cutting equipment segment is projected to be the fastest-growing segment in the cutting equipment, accessories, and consumables market, by equipment, for the next five years. The main growth drivers for the mechanized cutting equipment segment in this market are the manufacturing industry and the steel industry; the steel industry plays a vital role as steel is consumed in the construction industry, fabrication, and the manufacturing industry.

“Asia-Pacific accounted for the largest market share in 2015”

The market for cutting equipment, accessories, and consumables has been segmented on the basis of region into North America, Europe, Asia-Pacific, and RoW. Asia-Pacific accounted for the largest share of the total demand generated by the cutting equipment, accessories, and consumables market in 2015 because of the willingness of companies in the region to take up capital-intensive projects, along with the availability of technical expertise. The Asia-Pacific region is projected to be the fastest-growing market for cutting equipment, accessories, and consumables during the forecast period, owing to the rising economy and the rapid growth in the infrastructure sector.
