Abstracts

This report estimates the dosing systems market size in terms of \$million. This has been broken down into component regions and further split into countries.

Dosing systems are required to inject chemicals or liquids in production/processing of different products. Production activities across the globe coupled with increasing water and wastewater treatment activities is the main driver of the dosing systems market. However, issues associated with lack of greenfield investments and a slowing European market have slowed down the growth of this market.

In addition, the growth of the dosing systems market is directly proportional to the growth of industrialization around the world. On the basis of various factors such as type of machines, chemicals, and end-products, different types of dosing systems are required to inject chemicals/liquids.

Growth in production activities is attributed to the continuous increase in world population. This rise has resulted in increased production activities across geographies.

Various secondary sources such as encyclopedia, directories, and databases have been used to identify and collect information useful for this extensive commercial study of the global dosing systems market. Primary sources such as experts from industry

and suppliers have been interviewed to obtain and verify critical information as well as assess future prospects of the dosing systems market.

Leading market players of this industry have also been profiled with their recent developments and other strategic industry activities. These include IDEX Corp. (U.S.), Grundfos GmbH (Denmark), Seko S.p.A (Italy), SPX Corp. (U.S.), and Prominent GmbH (Germany) among others.

Asia-Pacific accounted for about than 40% of the total market share in 2014. In Asia-Pacific, China is the largest market. It, along with India, is expected to grow rapidly in the near future.

The dosing systems market has been segmented into six regions, namely North America, South America, Europe, Africa, Asia-Pacific, and the Middle East. The report also touches on various other important aspects of the market. It includes an analysis of the value chain, Porter's Five Forces' analysis, and a competitive landscape. In addition, 11 key players of this market have also been profiled.
