“The edible packaging market is projected to grow at a CAGR of 4.3%; the key drivers include efficiency in water use in drought-prone areas, cost efficiency in agriculture production, and enhanced crop yields”

The edible packaging market is estimated at USD 527 million in 2019 and projected to grow at a CAGR of 4.3%, to reach USD 679 million by 2025. The growth of the edible packaging market is driven by factors such as government initiatives, water conservation activities, enhancement of production, and decrease in production cost. This market is also driven by factors such as the ban on single-use plastics, growing environmental and sustainability concerns, increased shelf-life of fresh products without refrigeration, and development of new plant- and microorganism-based sources.

“The seaweed and algae sources led the market with the largest share in 2019.”

On the basis of raw material, the edible packaging market is classified into seaweed and algae, polysaccharides, lipids, and others, which include surfactants, composites, and carbohydrates. Seaweeds have emerged as a key raw material in edible packaging, which can be attributed to the inherent attributes of seaweeds as an edible source. Seaweeds have high fiber and vitamin content, which aid in the development of seaweed into packaging without the requirement for additional chemical compounds. Given the biodegradable properties of seaweed, it can even be disposed of without any further environmental implications. Seaweed can also be grown with minimal resource

support by negating requirements for water, fertilizers, and other key resources.

“Beverages accounted for the largest share of the edible packaging market in 2019.”

Based on end use, the use of edible packaging in beverages was observed to hold the dominant share in the edible packaging market. Beverages have emerged as a key area for growth in the market. This is primarily driven by water-soluble alternatives to standard plastic packaging. Products including water, juices, and even alcoholic beverages have emerged as the key areas for adoption in the edible packaging landscape. Products such as Ooho have gained widespread popularity among consumers as a water-pod, which can be ingested. Similarly, foodservice outlets are utilizing water-soluble packaging solutions in their everyday operations in an effort to reduce waste.

“Plant-based edible packaging holds the dominant market share, by source.”

On the basis of source, the plant-based segment is expected to hold the largest market share between 2019 and 2025. Plant-based sources have gained widespread popularity among manufacturers as a reliable source for the development of edible packaging solutions. Different types of plant-based sources, including fibrous vegetables, starch, carbohydrates, and seaweed have emerged as popular sources of edible packaging. Ingredients such as cassava have also been integrated into the process and are viewed as taste-neutral solutions to packaging. Seaweed-based sources have also been adapted into paper-packaging forms and witness widespread acceptance in foodservice industries.

“High growth is projected in the Asia Pacific edible packaging market.”

The Asia Pacific market is projected to be the fastest-growing market for the period considered for this study due to the strong potential for edible packaging solutions, which are being developed in the region. Edible packaging manufacturers see the region as a key launchpad for their offerings, given the growing resistance toward single-use plastics and government reforms toward packaging and waste generation. The region also hosts a strong manufacturing hub for the seaweed industry, which represents a key area for growth in the edible packaging market.

Break-up of Primaries:

By Company Type: Tier 1 - 70 %, Tier II - 25%, and Tier III – 5%

By Designation: C Level - 50%, D Level - 30%, and Others* - 20%

By Region: Asia Pacific – 45%, North America - 21%, Europe - 12%, South America – 12%, and RoW - 10%

Research Coverage:

The report segments the edible packaging on the basis of end use, packaging process, source, raw material, and region. In terms of insights, this report has focused on various levels of analyses—competitive landscape, end-use analysis, and company profiles, which together comprise and discuss views on the emerging & high-growth segments of the global edible packaging, high-growth regions, countries, government initiatives, drivers, restraints, opportunities, and challenges.

Reasons to buy this report:

To get a comprehensive overview of edible packaging

To gain wide-ranging information about the top players in this industry, their product portfolios, and key strategies adopted by them

To gain insights about the major countries/regions in which the edible packaging market is flourishing

8.2 FOOD

8.2.1 RAW & PROCESSED FOOD

8.2.1.1 Convenience in cooking and consumption influence raw & processed food market

8.2.2 BAKERY & CONFECTIONERY PRODUCTS

8.2.2.1 Focus on reducing the usage of non-biodegradable plastics in bakery & confectionery products

8.2.3 FROZEN FOODS

8.2.3.1 Focus on sustainable packaging and increasing shelf-life of products

8.3 BEVERAGES

8.3.1 NON-ALCOHOLIC BEVERAGES

8.3.1.1 Water, juices, and flavor extracts can be dissolved in the water or solution along with the extracts for consumption

8.3.2 ALCOHOLIC BEVERAGES

8.3.2.1 Alcoholic beverages wrapped in edible thin film balls are grabbing the attention of consumers at food service outlets

8.4 PHARMACEUTICALS

8.4.1 INCREASE IN ADOPTION OF STARCH AND PULLULAN IN PHARMACEUTICAL PACKAGING BOLSTERS GROWTH PROSPECTS

9 EDIBLE PACKAGING MARKET, BY PACKAGING PROCESS & SYSTEM

9.1 INTRODUCTION

9.2 ANTIMICROBIAL

9.2.1 AVOIDING THE HIGH RISK OF CONTAMINATION OF THE PRODUCT MAKES IT ONE OF THE IMPORTANT ASPECTS IN FOOD PACKAGING

9.3 NANOTECHNOLOGY

9.3.1 DEVELOPMENT OF NANOPlates AND ACCEPTANCE IN PROCESSED FOODS DRIVES NANOTECHNOLOGY-BASED PACKAGING

9.4 ELECTROHYDRODYNAMICS

9.4.1 IMPROVEMENTS IN PRODUCTION STANDARDS TO IMPROVE INDUSTRIAL

9.6.1 DEVELOPMENT IN SPECIALIZED APPLICATIONS TO SUPPORT MICROBIAL GROWTH IN PACKAGING

10 EDIBLE PACKAGING MARKET, BY REGION

10.1 INTRODUCTION

10.2 NORTH AMERICA

10.2.1 US

10.2.1.1 Focus on reducing the usage of non-renewable sources drive the demand for edible packaging in the US

10.2.2 CANADA

10.2.2.1 Reducing usage of cans and bottles to fuel growth of edible packaging

10.2.3 MEXICO

10.2.3.1 Socio-economic changes along with high demand for fast food products to drive market growth

10.3 EUROPE

10.3.1 GERMANY

10.3.1.1 Potential ban on the single-use plastics and increasing consumer awareness is projected to drive the adoption of edible packaging in Germany

10.3.2 FRANCE

10.3.2.1 Critical impact of plastic pollution and favorable legislation to drive the growth of the edible packaging market in France

10.3.3 UK

10.3.3.1 Government funding and increasing interest of consumers and businesses to encourage edible packaging adoption

10.3.4 ITALY

10.3.4.1 High adoption in the food and beverages industry to drive the demand for edible packaging solutions in Italy

10.3.5 SPAIN

10.3.5.1 The active involvement of manufacturers in the development of sustainable packaging solutions to encourage the growth of the Spanish market.

10.3.6 BELGIUM

10.3.6.1 Increasing demand for eco-friendly packaging alternatives to drive the demand for edible packaging in Belgium

10.3.7 REST OF EUROPE

10.4 ASIA PACIFIC

10.4.1 JAPAN

10.4.1.1 Companies in Japan are investing in the production of edible packaging products to reduce plastic waste

10.4.2 INDIA

10.4.2.1 Government initiatives estimated to drive the market for edible packaging in the country

10.4.3 CHINA

10.4.3.1 China generates high amount of waste owing to larger rural population

10.4.4 AUSTRALIA & NEW ZEALAND

10.4.4.1 Australia & New Zealand shifts focus toward edible packaging to reduce solid waste generation

10.4.5 INDONESIA

10.4.5.1 Higher production of varieties of seaweed drives the market for edible packaging in the country

10.4.6 REST OF ASIA PACIFIC

10.4.6.1 Consumer awareness about waste management in the region driving the market for edible packaging

10.5 SOUTH AMERICA

10.5.1 BRAZIL

10.5.1.1 Rise in awareness among consumers for reducing the usage of plastic and paper packaging is expected to drive the market for edible packaging in the country

10.5.2 ARGENTINA

10.5.2.1 Argentina is experiencing growth and expansion of supermarkets and hypermarkets

10.5.3 REST OF SOUTH AMERICA

10.6 REST OF THE WORLD (ROW)

10.6.1 MIDDLE EAST

10.6.1.1 Demand and consumption of processed foods lead to increased growth and investment opportunities for edible packaging in the middle east

10.6.2 AFRICA

10.6.2.1 Necessary measures to ban use of plastic packaging
