Abstracts

The market size of the electronic warfare market is estimated to be valued at USD 20.55 billion in 2016 and is projected to grow at a CAGR of 4.29% during the forecast period, to reach USD 25.36 billion by 2021. Growing number of wars and transnational disputes, emergence of cognitive electronic warfare technology, increased system reliability and efficiency due to the introduction of TWT (travelling-wave tube)-based solutions, and advancements due to integrated electronic warfare systems are the factors driving the market.

'Electronic support segment to lead the global electronic warfare market'

Electronic support is the largest share-contributing segment in the electronic warfare market. This segment plays a significant role in recognizing the threats in tactical environment. Due to this importance of an electronic system in the electronic warfare system, it is the most used category. This is the factor due to which electronic support is at a dominant position in the electronic warfare category segment.

'The electronic warfare market in the Asia-Pacific region is projected to grow at a rapid pace during the forecast period'

This growth is mainly attributed to huge population base, booming economy, increasing funding/investments towards the development of electronic warfare products, growing focus of both, international and domestic players on the APAC electronic warfare

market, and a large number of R&D activities.
