## **Abstracts**

“The encapsulants market is projected to grow at a CAGR of 5.5% from 2017 to 2022”

The encapsulants market is estimated to be USD 1.26 billion in 2017 and is projected to reach USD 1.64 billion by 2022, at a CAGR of 5.5% from 2017 to 2022. Increased demand for encapsulants from consumer electronics, transportation, medical, and energy & power end-use industries is expected to drive the encapsulants market across the globe. Encapsulants are one of the most widely used protective materials in electronics. They are also used as protective materials to completely embed electronic circuitry. Volatility in raw material prices may restrain the industry during the forecast period.

“The consumer electronics segment is expected to be the largest end-use industry segment during the forecast period”

Based on end-use industry, the consumer electronics segment is expected to be the largest end-use industry segment of the encapsulants market during the forecast period, in terms of value. The rapidly growing semiconductor & electronics industry and the increasing demand for smart electronic gadgets are the major factors fueling the demand for encapsulants in this industry. The trend of miniaturization and increasing multi-functionality of electronic devices have increased the number of components and risks associated with short-circuiting. These have necessitated the use of encapsulants in electronic devices.

“The room temperature curing type segment is projected to grow at the highest CAGR during the forecast period”

Based on curing type, the room temperature segment of the encapsulants market is projected to grow at the highest CAGR from 2017 to 2022. Room temperature curing systems offer easy processing, high reliability, and are low cost.

“The Asia Pacific encapsulants market is projected to grow at the highest CAGR during the forecast period”

The growth of the Asia Pacific encapsulants market can be attributed to the rapidly increasing demand from end-use industries, such as consumer electronics, transportation, medical devices, and energy & power. The demand for encapsulants is expected to increase in this region due to the growing demand for consumer electronic products & components used in transportation and technological innovation that will create opportunities for encapsulants as an ideal material.
