## **Abstracts**

“Food service packaging market projected to grow at a CAGR of 5.23%”

The food service packaging market size is projected to grow at a CAGR of 5.23% during the forecast period of 2017–2022, and reach USD 84.33 billion by 2022. Food service packaging is used to package processed and semi-processed food products. The growth in demand from restaurants, fast food joints, takeaway restaurants, quick-service restaurants, and catering services will propel the market for food service packaging. Food service packaging helps in maintaining the hygiene, quality, and safety of food products. It provides heat resistance, prevents the growth of microorganisms, and helps extend the shelf-life of the food product.

“The plastic segment accounted for the highest market share in the food service packaging market in 2015”

The plastic segment, by material, dominated the food service packaging market in 2016 and is projected to retain the leading position through 2022. Plastic minimizes the use of resources by allowing the manufacturer to make packages that wrap around the product and offer high visibility. It can be used for the packaging of any type of food products, is easily recyclable, and offers resistance to heat.

“The flexible packaging segment, by packaging type, accounted for the highest market share in the food service packaging market”

The food service packaging market has been segmented into three types, namely, flexible, paper & paperboard, and rigid. The flexible segment led the demand for packaging in food service packaging in 2016 and is projected to grow at the highest CAGR from 2017 to 2022. Factors such as cost-effectiveness, ease of handling, and ability to package frozen food and ready-to-eat food are driving the demand for flexible packaging. The ability to withstand high temperature is also influencing the growing application of flexible packaging in the food service packaging market.

“The Asia-Pacific region expected to witness the fastest-growth during the forecast period”

The Asia-Pacific region is projected to register the highest CAGR globally, between 2017 and 2022. China was the largest market for food service packaging in the Asia-Pacific region, in 2016. The market in India is projected to grow at the highest CAGR during the forecast period, whereas China accounted for the largest share in the food service packaging market in 2016. The demand for food service packaging in this region is attributed to the developing market because the standard of living of its population is rapidly improving and the demand for convenient packaging options is on the rise.
