## **Abstracts**

“The FRP gratings market is projected to grow at a CAGR of 4.24% during the forecast period”

The global FRP gratings market is projected to reach USD 574.2 million by 2021, at a CAGR of 4.24% from 2016 to 2021. The key factor expected to drive the growth of the FRP gratings market is the increasing demand for FRP gratings from various industries. FRP gratings are corrosion and heat resistant, require low maintenance, and are preferred in the pharmaceutical, marine, oil & gas, food processing industries.

“Based on process, the pultruded FRP gratings segment is projected to witness a higher growth”

Pultruded FRP gratings exhibit better performance than molded gratings. Pultruded gratings are suitable for use in various applications because of their dimensional stability, high strength, light weight, impact resistance, low flammability, impact resistance, and low maintenance.

“Asia-Pacific is expected to be the fastest-growing market for FRP gratings”

Asia-Pacific is expected to be the fastest-growing market for FRP gratings during the forecast period. The market in Asia-Pacific is driven by the increasing adoption of high-performance FRP gratings in various applications across end-use industries in the

region.
