Abstracts

Pico projectors are an emerging technology set to revolutionize the global projector market by making projectors portable enough to fit into a person's pocket. Pico projectors can be in form of a small handheld device, or in the form of a tiny light-engine added as an accessory to consumer electronics such mobile phones, cameras, laptops, and PDAs.

There were over 130 pocket projectors commercially available in 2009, a dramatic change from around 10 models in the market in 2008. The report gives insights to the market trends and the high-growth segments of the global pico projector market. The market is currently in a nascent, high-growth phase, and thus presents plentiful opportunities to early entrants. Market players also have significant R&D possibilities for future growth.

Most projectors currently available are of the stand-alone or media player variety, which can be attached to any media device through external ports and hence can be used with multiple gadgets. However, as the market matures further, projectors that can be embedded in consumer electronics are expected to have the highest market share.

AAXA, Aiptek, Optoma, Samsung, and 3M have already rolled out their pico projectors in the market. Nikon is offering a projector camera, and Apple and Samsung have announced the world's first projector-phones. The global pico projector market is estimated to grow from \$116.5 million in 2009 to reach \$6,080.57 million in 2014 at a CAGR of 120.56% from 2009 to 2014.

What makes our reports unique?

We provide the longest market segmentation chain in this industry- not many reports provide market breakdown upto level 5.

We provide 10% customization. Normally it is seen that clients do not find specific market intelligence that they are looking for. Our customization will ensure that you necessarily get the market intelligence you are looking for and we get a loyal customer.

We conduct detailed market positioning, product positioning and competitive positioning. Entry strategies, gaps and opportunities are identified for all the stakeholders.

Comprehensive market analysis for the following sectors:

Pharmaceuticals, Medical Devices, Biotechnology, Semiconductor and Electronics, Energy and Power Supplies, Food and Beverages, Chemicals, Advanced Materials, Industrial Automation, and Telecom and IT. We also analyze retailers and super-retailers, technology providers, and research and development (R&D) companies.

Key questions answered

Which are the high-growth segments/cash cows and how is the market segmented in terms of oral drugs, injectables?

What are market estimates and forecasts; which markets are doing well and which are not?

Where are the gaps and opportunities; what is driving the market?

Which are the key playing fields? Which are the winning edge imperatives?

How is the competitive outlook; who are the main players in each of the segments; what are the key selling products; what are their strategic directives, operational strengths and product pipelines? Who is doing what?

Powerful Research and analysis

The analysts working with MarketsandMarkets come from renowned publishers and market research firms, globally, adding their expertise and domain understanding. We get the facts from over 22,000 news and information sources, a huge database of key industry participants and draw on our relationships with more than 900 market research companies across the world. We, at MarketsandMarkets, are inspired to help our clients grow by providing qualitative business insights with our huge market intelligence repos
