Abstracts

The best in safety, security and comfort that was originally intended for the technologically inclined is now within reach of the general public through smart homes. Smart homes not only make the daily routine convenient and time saving but also provide energy efficiency. Elderly and disabled rely heavily on home care and smart homes promises to improve their living standards. The benefits of smart homes can be endless. Starting from the gate access to the irrigation of a garden can be done with ease. Smart homes have already started attracting the stakeholders in the market including architects, developers and device manufacturers. The possibility of reduction in the prices of smart homes and expected adoption of technology is the key to the market's growth in the future. With the stakeholders becoming active in the market for developing new and improved standards in smart home, this market is expected to grow at a good pace for many years to come.

Existing studies and third party market reports do not provide a comprehensive understanding of the smart homes market and there is a lack of focus on its various market segments. In this report, we provide size and estimates of smart homes market and its various sub segments that has not yet been done. A geographic split of each of the submarket is also provided in our report which is not present in any of the other third party reports.
