Abstracts

The global infertility treatment market size is projected to reach USD 2.2 billion by 2026 from USD 1.5 billion in 2021, at a CAGR of 8.1 % during the forecast period. Factors such as decline in the fertility rates worldwide, increase adoption of different infertility procedures, rising number of fertility clinics worldwide, rise in public & private investments and presence of advanced infertility treatment products in the market are anticipated to boost the growth of the market.

The recent COVID-19 global pandemic has also impacted the infertility treatment market. Logistical issues, managing patients with the disease, prioritizing patients with comorbidities and pre-existing conditions, and protecting public & hospital frontline workers from exposure to the COVID-19 infection are the major challenges faced by healthcare systems across the globe. One in six reproductive-aged couples experiences infertility, and many turn to treatments such as intrauterine insemination (IUI) and in vitro fertilization (IVF), which require in-person appointments to complete. In India, 30 lakh people seek infertility treatment every year, but only 5 lakh people undergo IVF/intrauterine insemination (IUI) procedures. During the COVID-19 pandemic, a 90% drop was observed in the number of people undergoing IVF cycles. The spread of COVID-19 has not only impacted fertility clinics owing to the cancellation of IVF treatments but has also impacted fertility decisions among couples who were opting for IVF treatment before the pandemic.

“The equipment to capture the largest share in infertility treatment market, by products during the forecast period.”

The equipment segment is expected to witness the highest growth rate during the forecast period. The high growth in this owes to the technological advancements and presence of well-established players with strong product portfolio. Along with this growing focus of players towards base expansion through adopting various strategies such as new equipment launch, showcase across the globe is likely to contribute towards the growth of the segment.

“The assisted reproductive technology (ART) to capture the largest market share of infertility treatment market, by the procedure in 2021.”

The assisted reproductive technology segment captured the largest share of the infertility treatment market procedures during the forecast period. The growing awareness of the presence of ART, rise in success rate of this procedure and growing worldwide acceptance of ART is likely to boost the growth of the segment.

“The female infertility treatment segment commanded for the largest share of the infertility treatment market, by patient type, in 2021”

The decreasing rates of fertility among females, growing availability of various fertility treatment options, and the increasing number of fertility centers across the globe are driving the growth of the female infertility treatment market.

“The fertility centers segment accounted for the largest share of the infertility treatment market, by end user, in 2021”

The rising government initiatives to establish fertility clinics, initiatives taken by large international healthcare providers to establish fertility centers, and the increasing popularity of IVF & ICSI treatment globally are some of the factors likely to contribute towards the rapid growth of the segment.

“The Asia Pacific market to grow at the highest CAGR during the forecast period.”

The infertility treatment market is segmented into five major regions, namely, North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. Increase in the awareness of availability of infertility treatment procedures, growing fertility centers in

the region, rising healthcare expenditures, increasing patient population, growing medical tourism, improving healthcare expenditure on infertility treatment, and initiatives by the government to increase the accessibility of the infertility treatment in the emerging nations.

Breakdown of supply-side primary interviews:

By Company Type: Tier 1: 25%, Tier 2: 30%, and Tier 3: 45%

By Designation: C-level: 26%, D-level: 30%, and Others: 44%

By Region: North America: 40%, Europe: 31%, APAC: 20%, Latin America: 6%, and the Middle East & Africa: 3%

The Cooper Companies Inc. (US), Cook Group (US), Vitrolife (Sweden), Thermo Fisher Scientific, Inc. (US), Esco Micro Pte. Ltd. (Singapore), Genea Biomedx (Australia), IVFtech ApS (Denmark), FUJIFILM Irvine Scientific (US), The Baker Company, Inc. (US), Kitazato Corporation (Japan), Rocket Medical plc (UK), IHMedical A/S (Denmark), Hamilton Thorne Ltd. (US), ZEISS Group (Germany), MedGyn Products, Inc. (US), DxNow, Inc. (US), Nidacon International AB (Sweden), Gynotec B.V. (Netherlands), SAR Healthline Pvt. Ltd. (India), and InVitroCare Inc. (US).

Research Coverage

This report studies the global infertility treatment market based on the product, procedure, patient type, end users, and region. The report also studies factors (such as drivers, restraints, opportunities, and challenges) affecting market growth and provides details of the competitive landscape for market leaders. Furthermore, the report analyzes micromarkets with respect to their individual growth trends and forecasts the revenue of the market segments with respect to five major regions (and the respective countries in these regions).

Key Benefits of Buying the Report

This report focuses on various levels of analysis—industry trends, market share of top players, and company profiles, which together form basic views and analyze the competitive landscape, emerging segments of the global infertility treatment market, and high-growth regions and their drivers, restraints, opportunities, and challenges. The

report will help both established firms as well as new entrants/smaller firms to gauge the pulse of the market and garner greater market shares.

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

FIGURE 19 INFERTILITY TREATMENT MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

5.2.1 DRIVERS

5.2.1.1 Declining fertility rate

FIGURE 20 DECLINING GLOBAL FERTILITY RATE, BY REGION, 1990 VS. 2019 VS. 2030

FIGURE 21 RISING OBESITY RATES (PERCENTAGE OF THE US POPULATION):

2010 VS. 2030

5.2.1.2 Rising number of fertility clinics worldwide

5.2.1.3 Technological advancements

5.2.1.3.1 Advancements in infertility treatment devices

5.2.1.3.2 Increasing use of time-lapse technology worldwide

5.2.1.4 Increasing public-private investments, funds, and grants

5.2.2 RESTRAINTS

5.2.2.1 High costs associated with assisted reproductive technology in developed markets

TABLE 1 INFERTILITY TREATMENT COSTS

5.2.2.2 Unsupportive government regulations

5.2.3 OPPORTUNITIES

5.2.3.1 Growth opportunities in emerging markets

5.2.3.1.1 Improving healthcare infrastructure

5.2.3.2 Increasing medical tourism due to low treatment costs

5.2.3.3 Use of fertility treatment options by single parents and same-sex couples

5.2.4 CHALLENGES

5.2.4.1 Concerns related to ART procedures

5.2.4.2 Reduced efficacy among older women

5.3 REGULATORY LANDSCAPE
