Abstracts

The inorganic scintillators market is projected to reach USD 330.7 million by 2021 from USD 256.1 million in 2016, at a CAGR of 5.2% in the next five years (2016 to 2021).

The inorganic scintillators market is undergoing a significant transformation, with the changing landscapes of healthcare, nuclear power plants, homeland security and defense, and manufacturing industries. The growth of this market is majorly influenced by the dynamics of these industries.

Growing safety concerns post the Fukushima disaster, growing security threats, growing security budgets of global sporting events, increasing incidence of cancer, growth in the number of PET/CT scans, and growing threat of nuclear terrorism are some factors expected to drive the growth of the global inorganic scintillators market in the coming years. On the other hand, factors such as shortage of a nuclear power workforce worldwide and nuclear power phase-out in some European countries are expected to restrain the growth of the market. However, the increase in the number of nuclear power plants in India and Pacific countries, growing focus on clean and reliable electricity generation in China, and the decision of the Japanese government to reverse its nuclear power phase-out are posing lucrative opportunities for the inorganic scintillators market.

Lutetium oxyorthosilicate (LSO) & lutetium-yttrium oxyorthosilicate (LYSO) segment has benefits over other scintillators such as higher light output and short decay time. Thus,

the LSO and LYSO segment is expected to grow at highest CAGR during the forecast period. However, sodium iodide (NaI) segment is expected to have largest market size in 2016.

Healthcare segment is estimated to grow at highest CAGR during forecast period, due to rising terrorism levels globally, growing government initiatives by governments worldwide to improve homeland security, and increasing security and defense expenditure. Furthermore, healthcare will have largest market size in 2016, due to increasing incidence of cancer, rising research activity, increasing installations of PET scanners worldwide, and growing preference for effective radiation protection in medical facilities.

In 2016, North America is expected to account for the largest share of the global inorganic scintillators market, followed by Europe, Asia-Pacific, and the Rest of the World (RoW). North America's large share is attributed to the increasing prevalence of cancer, rising adoption of nuclear imaging systems, government initiatives, the increase in the number of nuclear power plants in the U.S., growing security concerns, and the rising number of conferences. In the coming years, the inorganic scintillators market is expected to witness the highest growth in the Asia-Pacific region, with emphasis on India, China, and Japan. This can be attributed to factors such as high spending on homeland security in Asia, Japan's decision to continue with the use of nuclear power, high growth expected in China's nuclear power industry, presence of global and local players in the Chinese market, increasing number of nuclear power plants in India, and increasing installations of nuclear imaging systems in India.

The market witnesses high competitive intensity, as there are several big and many small firms with similar product offerings. These companies adopt various strategies (expansions; new product launches; marketing and promotion; agreements, collaborations, contracts, partnerships, and joint ventures; funding; acquisitions; patent grant, website launch, and product enhancement to increase their market shares and establish a strong foothold in the global market.

In-depth interviews were conducted with CEOs, Sales and Marketing Directors, other innovation and technology directors, and executives from various key organizations operating in the adaptive security market place.

By Company Type: Tier 1: 50%, Tier 2: 42%, Tier 3: 8%

By Designation: Director Level: 58%, C-Level: 25%, Others: 17%

By Region: North America: 46%, Europe: 31%, APAC: 15%, ROW: 8%

The report includes the study of key players offering inorganic scintillators such as Saint-Gobain S.A. (France), Hamamatsu Photonics K.K. (Japan), Dynasil Corporation of America (U.S.), Hitachi Metals Group (Japan), REXON Components, Inc. (U.S.), Detec (Canada), Toshiba Materials Co., Ltd. (Japan), Scintacor (U.K.), EPIC Crystal Company Limited (China), Amcrys (Ukraine), Alpha Spectra, Inc. (U.S.), Shanghai SICCAS High Technology Corporation (China), and Nihon Kessho Kogaku Co., Ltd. (Japan).

Reasons to Buy the Report:

The report will enrich both established firms as well as new entrants/smaller firms to gauge the pulse of the market, which in turn helps firms to garner a greater market share. Firms purchasing the report could use any one or a combination of the below-mentioned five strategies (market penetration, product development/innovation, market development, market diversification, and competitive assessment) for strengthening their market shares.

The report provides insights on the following pointers:

Market Penetration: Comprehensive information on the products and services offered by top players in the inorganic scintillators market. The report analyzes the inorganic scintillators market by scintillation material, type, and application.

Product Development/Innovation: Detailed insights on upcoming technologies, research and development activities, and new product launches in the inorganic scintillators market

Market Development: Comprehensive information about lucrative emerging markets. The report analyzes the markets for light detectors across regions

Market Diversification: Exhaustive information about new products, untapped regions, recent developments, and investments in the inorganic scintillators market

Competitive Assessment: In-depth assessment of market shares, strategies, products, and distribution networks of the leading players in the inorganic

scintillators market

Contents

1 INTRODUCTION

- 1.1 OBJECTIVES OF STUDY
- 1.2 MARKET DEFINITION
 - 1.2.1 MARKETS COVERED
 - 1.2.2 YEARS CONSIDERED FOR THE STUDY
- 1.3 CURRENCY
- 1.4 LIMITATIONS
- 1.5 STAKEHOLDERS

2 RESEARCH METHODOLOGY

- 2.1 RESEARCH METHODOLOGY STEPS
- 2.2 SECONDARY AND PRIMARY RESEARCH METHODOLOGY
 - 2.2.1 SECONDARY RESEARCH
 - 2.2.2 PRIMARY RESEARCH
 - 2.2.2.1 Key data from primary sources
 - 2.2.2.2 Key Insights from primary sources
- 2.3 KEY INDUSTRY INSIGHTS
- 2.4 MARKET SIZE ESTIMATION METHODOLOGY
- 2.5 MARKET DATA VALIDATION AND TRIANGULATION
- 2.6 ASSUMPTIONS FOR THE STUDY

3 EXECUTIVE SUMMARY

- 3.1 INTRODUCTION
- 3.2 CONCLUSION

4 PREMIUM INSIGHTS

- 4.1 GLOBAL INORGANIC SCINTILLATORS MARKET OVERVIEW
- 4.2 GEOGRAPHIC ANALYSIS: INORGANIC SCINTILLATORS MARKET, BY TYPE
- 4.3 GLOBAL INORGANIC SCINTILLATORS, BY APPLICATION (2016 VS. 2021)
- 4.4 GEOGRAPHIC SNAPSHOT: INORGANIC SCINTILLATORS MARKET

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

5.2.1 MARKET DRIVERS

5.2.1.1 Increasing volume of PET/CT scans

5.2.1.1 Growing safety concerns post the Fukushima disaster

5.2.1.2 Growing security threats to drive the inorganic scintillators market for homeland security

5.2.1.3 Rising security budgets of global sporting events

5.2.1.4 Increasing incidence of cancer

5.2.1.5 Growing threat of nuclear terrorism

5.2.2 MARKET RESTRAINTS

5.2.2.1 Shortage of nuclear power workforce

5.2.2.2 Nuclear power phase-out in some European and Asian countries

5.2.3 MARKET OPPORTUNITIES

5.2.3.1 Proposed increase in the number of nuclear power plants

5.2.3.2 Japan's decision to reverse nuclear phase-out

5.2.3.3 Rising focus on nuclear power in India to meet energy demands

5.2.3.4 Growing demand for a clean and reliable source of electricity generation in China

5.2.3.5 Introduction of nuclear power in Pacific countries

5.2.4 MARKET THREAT

5.2.4.1 Substitutes such as renewable energy

6 GLOBAL INORGANIC SCINTILLATORS MARKET, BY SCINTILLATION MATERIAL

6.1 INTRODUCTION

6.2 SODIUM IODIDE

6.3 CESIUM IODIDE

6.4 LUTETIUM OXYORTHOSILICATE & LUTETIUM–YTTRIUM OXYORTHOSILICATE

6.5 BISMUTH GERMANATE

6.6 OTHER SCINTILLATION MATERIALS

7 GLOBAL INORGANIC SCINTILLATORS MARKET, BY TYPE

7.1 INTRODUCTION

7.2 ALKALI HALIDES

7.3 OXIDE COMPOUNDS

7.4 RARE EARTH METALS

8 INORGANIC SCINTILLATORS MARKET, BY APPLICATION

- 8.1 INTRODUCTION
- 8.2 HEALTHCARE
- 8.3 HOMELAND SECURITY AND DEFENSE
- 8.4 NUCLEAR POWER PLANTS
- 8.5 INDUSTRIAL APPLICATIONS
- 8.6 OTHERS

9 GLOBAL INORGANIC SCINTILLATORS MARKET, BY REGION

- 9.1 INTRODUCTION
- 9.2 NORTH AMERICA
 - 9.2.1 U.S.
 - 9.2.1.1 Increased adoption of nuclear imaging systems
 - 9.2.1.2 Government initiatives and increasing number of nuclear power plants
 - 9.2.1.3 Conferences as a platform for knowledge exchange
 - 9.2.1.4 Growing security concerns
 - 9.2.2 CANADA
 - 9.2.2.1 Rise in funding
 - 9.2.2.2 Increasing adoption of nuclear imaging systems
- 9.3 EUROPE
 - 9.3.1 GROWING RESEARCH ACTIVITIES IN EUROPE
 - 9.3.2 FRANCE AND RUSSIA TO LEAD THE GROWTH OF THE EUROPEAN NUCLEAR INDUSTRY
 - 9.3.3 INCREASING PARTNERSHIPS FOR THE CONSTRUCTION OF NUCLEAR POWER PLANTS
 - 9.3.4 EUROPE-5
 - 9.3.4.1 Security concerns
 - 9.3.4.2 Stabilization of Europe's nuclear power industry, post the Fukushima disaster
 - 9.3.4.3 Increasing adoption of nuclear imaging systems/equipment
 - 9.3.4.4 Favorable funding scenario in Germany
 - 9.3.4.5 Increasing number of PET-CT procedures and investments on PET/CT scanners in the U.K.
 - 9.3.5 REST OF EUROPE (ROE)
 - 9.3.5.1 Conferences & symposia
- 9.4 ASIA-PACIFIC
 - 9.4.1 HEIGHTENED SPENDING ON HOMELAND SECURITY IN ASIA

9.4.2 INCREASING RESEARCH ON INORGANIC SCINTILLATORS

9.4.3 JAPAN

9.4.3.1 Japan's decision to continue with the use of nuclear power

9.4.4 CHINA

9.4.4.1 High growth expected in china's nuclear power industry

9.4.4.2 Presence of global and local players in the chinese market

9.4.5 INDIA

9.4.5.1 Increasing number of nuclear power plants in India

9.4.5.2 Increasing installations of nuclear imaging systems in India

9.4.6 REST OF ASIA-PACIFIC

9.4.6.1 Infrastructural development

9.5 REST OF THE WORLD (ROW)

9.5.1 SOUTH AFRICA'S STRONG COMMITMENT TO ADOPTING NUCLEAR POWER

9.5.2 STRENGTHENING OF HOMELAND SECURITY

9.5.3 FAVORABLE REIMBURSEMENT SCENARIO IN BRAZIL

9.5.4 DEVELOPMENT OF NEW AIRPORTS IN LATIN AMERICA

9.5.5 INCREASING NUMBER OF NUCLEAR POWER PLANTS IN THE MIDDLE EAST

10 COMPETITIVE LANDSCAPE

10.1 OVERVIEW

10.2 MARKET SHARE ANALYSIS

10.2.1 SAINT-GOBAIN S.A.

10.2.2 HAMAMATSU PHOTONICS K.K.

10.2.3 DYNASIL CORPORATION OF AMERICA

10.3 COMPETITIVE SITUATION AND TRENDS

10.3.1 EXPANSIONS

10.3.2 NEW PRODUCT LAUNCHES

10.3.3 MARKETING AND PROMOTION

10.3.4 AGREEMENTS, COLLABORATIONS, CONTRACTS, PARTNERSHIPS, AND JOINT VENTURES

10.3.5 FUNDING

10.3.6 ACQUISITIONS

10.3.7 OTHER DEVELOPMENTS

10.4 EMPIRICAL ASSESMENT OF GROWTH STRATEGIES

10.4.1 ROUTE TO GROWTH: ORGANIC VS. INORGANIC STRATEGIES

10.4.1.1 Organic growth strategies

10.4.1.2 Inorganic growth strategies

About

North America accounted for the largest share of XX% of the global inorganic scintillators market in 2013. It was valued at an estimated \$XX million in 2013 and is expected to reach \$XX million by 2018, at a CAGR of XX% from 2013 to 2018. This high growth in the North American market can be attributed to the increase in the number of power plants in the U.S. and Canada, technological advancements, and the increasing use of CT scanners and radiation therapy to treat cancer.

The Asian market is the fastest-growing market at a CAGR of XX% from 2013 to 2018. This high growth rate can be attributed to the increase in the number of nuclear power plants in China, India, and Southeast Asia; Japan's decision to continue using nuclear power; and the increasing use of nuclear medicine imaging in Asian countries.

The market for inorganic scintillators is fragmented, with a variety of small and large competitors, where the degree of fragmentation and the identities of competitors vary according to their target markets i.e. healthcare, nuclear power plants, homelands security and defense, and others.

Companies with greater financial resources are able to focus those resources on developing products or services that are more attractive to potential customers as compared to companies with limited financial resources. Substantially larger and better capitalized firms have the ability to combine solutions into an integrated offering at attractive prices. Therefore in order to improve their competitive positions, companies offer these solutions at lower prices. These competitive factors could make it more difficult for the smaller firms to attract and retain customers, causing them to lower their prices which may have an adverse effect on their market share and revenue.

I would like to order

Product name: Inorganic Scintillators Market by Scintillation Material (NaI, CsI, LSO & LYSO), Type (Alkali Halides, Rare Earth Metals), & Application (Healthcare, Homeland Security & Defense, Nuclear Power Plants) - Analysis & Global Forecast to 2021

Product link: <https://marketpublishers.com/r/IDE5BDD3DDEEN.html>

Price: US\$ 5,650.00 (Single User License / Electronic Delivery)
