Abstracts

The Insolvency Software market is projected to grow from USD 1.5 billion in 2023 to USD 2.4 billion by 2028, at a CAGR of 10.4% during the forecast period, according to MarketsandMarkets. Increasing demand for automated tools to make well-informed decisions in insolvency cases will accelerate market growth. Businesses are increasingly using automation and digital tools to improve insolvency processes. This involves speeding up procedures, reducing administrative workloads, enhancing accuracy, utilizing data analytics for better decision-making, facilitating communication and collaboration among stakeholders, ensuring compliance, cutting costs, streamlining document management, automating workflows, and achieving more efficient and successful insolvency outcomes.

“By Organization Size, the large enterprise segment is expected to hold the largest market size during the forecast period.”

Large enterprises are the early adopters of insolvency software. Though large enterprises have the necessary budgets to use the on-premises deployment mode, they are moving toward the cloud deployment mode to avail features such as increased availability, high scalability, and low cost of deployment. The heterogeneous IT environment and the inability of the IT systems to communicate with each other are the chief reasons for the increasing deployment of insolvency software by large enterprises.

The demand for insolvency software in large enterprises arises from the necessity to handle intricate insolvency and bankruptcy cases efficiently and compliantly.

“By Vertical, the BFSI segment is expected to grow with the highest CAGR during the forecast period.”

Given the unique demands and complexities of insolvency cases within this sector, the BFSI (Banking, Financial Services, and Insurance) segment is a key area of focus for insolvency software. Insolvency software tailored to the BFSI segment provides a range of specialized features and functionalities to address the specific needs of financial institutions, credit providers, and insurance companies facing insolvency situations. The BFSI vertical has been one of the early adopters of insolvency software solutions.

“Asia Pacific is expected to grow with the highest CAGR during the forecast period.”

The APAC region comprises major economies such as China, India, Japan, and Australia. The region is expected to grow the fastest in terms of insolvency software and services deployment. Growing industrialization and increased competition have proved to be one of the biggest drivers for the insolvency software market in this region.

Breakdown of primaries

The study contains insights from various industry experts, from solution vendors to Tier 1 companies. The break-up of the primaries is as follows:

By Company: Tier 1–62%, Tier 2–23%, and Tier 3–15%

By Designation: C-Level Executives–38%, Directors–30%, and Others–32%

By Region: North America–40%, Europe–15%, Asia Pacific–35%, Middle East and Africa–5%, Latin America–5%,

The major players in the Insolvency Software market are Clio (Canada), CARET (US), Altisource (US), Aryza (Ireland), Stretto (US), Epiq (US), Kroll (US), Turnkey IPS (UK), QwikFile (US), Fastcase (US), CaseWare (Canada), Standard Legal (US), LegalPRO (US), PracticePanther (US), Smokeball (US), Litera (US), stp.one (Germany), NeSL (India), Fileassure (Canada), and CloudLex (US). These players have adopted various

growth strategies, such as partnerships, agreements and collaborations, new product launches, enhancements, and acquisitions to expand their footprint in the Insolvency Software market.

Research Coverage

The report segments the global Insolvency Software market by offering into two categories: solutions and services. The service segment is divided into five categories: Professional Services and Management Services. By applications into six categories: Document Management, Reporting, Compliance, Financial Transaction Management, Creditor Management, Others, and Others. By vertical into seven categories: IT and Telecommunication, Government, BFSI, Manufacturing, Energy and Utilities, Retail, and Other Verticals. The market has been segmented by region into North America, Europe, Asia Pacific, Middle East and Africa, and Latin America.

Key benefits of the report

The report would help the market leaders/new entrants with information on the closest approximations of the revenue numbers for the overall Insolvency Software market and the subsegments. This report would help stakeholders understand the competitive landscape and gain insights to position their businesses better and plan suitable go-to-market strategies. The report would help stakeholders understand the market's pulse and provide them with information on the key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

Analysis of key drivers (Increasing adoption of digitalized tools within various industries, The increasing number of bankruptcy cases, cost-effectively managing insolvency cases, Increasing demand for automated tools to make well-informed decisions in insolvency cases), restraints (Resistance to adopting new technologies and processes, can hinder software adoption.), opportunities (Ongoing trend for digitalization in the IT industry), and challenges (Lack of data privacy and safety is a threat in this market, Regulatory compliance can be challenging in insolvency software market) influencing the growth of the Insolvency Software market.

Product Development/Innovation: Detailed insights on upcoming technologies, research and development activities, and new product and service launches in the Insolvency Software market.

Market Development: Comprehensive information about lucrative markets – the report analyses the Insolvency Software market across varied regions.

Market Diversification: Exhaustive information about new products and services, untapped geographies, recent developments, and investments in the Insolvency Software market.

Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players such as Clio (Canada), CARET (US), Altisource (US), Aryza (Ireland), Stretto (US), Epiq (US), Kroll (US), Turnkey IPS (UK), QwikFile (US), Fastcase (US), CaseWare (Canada), Standard Legal (US), LegalPRO (US), PracticePanther (US), Smokeball (US), Litera (US), stp.one (Germany), NeSL (India), Fileassure (Canada), and CloudLex (US).

5 MARKET OVERVIEW AND INDUSTRY TRENDS

5.1 MARKET OVERVIEW

5.2 MARKET DYNAMICS

FIGURE 20 DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES: INSOLVENCY SOFTWARE MARKET

5.2.1 DRIVERS

5.2.1.1 Increase in adoption of digitalization within financial industry

5.2.1.2 Rise in number of bankruptcy cases

5.2.1.3 Need for cost-effective and efficient solution to process volume without additional headcount

5.2.1.4 Growth in demand for automated tools to make well-informed decisions

5.2.2 RESTRAINTS

5.2.2.1 Resistance to shift away from legacy systems

5.2.3 OPPORTUNITIES

5.2.3.1 Ongoing trend for digitalization in IT industry

5.2.3.2 Increase in automation to boost adoption of emerging technology

5.2.3.3 Rise in demand for software automation and innovative applications

5.2.4 CHALLENGES

5.2.4.1 Lack of data privacy and safety

5.2.4.2 Maintaining compliance in changing regulatory landscape

5.2.4.3 Need for third-party providers to enable and manage technology and hosting aspects

5.3 INDUSTRY TRENDS

5.3.1 BRIEF HISTORY OF INSOLVENCY SOFTWARE MARKET

FIGURE 21 BRIEF HISTORY OF INSOLVENCY SOFTWARE

5.3.1.1 Early software solutions and transition to Windows-based software

5.3.1.2 Integration of legal research

5.3.1.3 Automation and workflow management

5.3.1.4 Cloud-based advanced analytics solutions

5.3.1.5 Data privacy and safety concerns

5.3.1.6 Enhancement in software with new emerging technologies

5.3.2 BEST PRACTICES IN INSOLVENCY SOFTWARE MARKET

5.3.3 VALUE CHAIN ANALYSIS

FIGURE 22 INSOLVENCY SOFTWARE MARKET: VALUE CHAIN ANALYSIS

5.3.4 ECOSYSTEM MAPPING

FIGURE 23 INSOLVENCY SOFTWARE ECOSYSTEM
