Abstracts

“The global ion exchange resins market size is projected to register a CAGR of 4.2%, in terms of value, between 2020 and 2025.”

The global ion exchange resins market size is projected to grow from USD 1.8 billion in 2020 to USD 2.2 billion by 2025, at a CAGR of 4.2%, between 2020 and 2025. Urbanization in APAC, increasing demand for nuclear electricity generation in emerging economies, and stringent environmental regulations are the major growth drivers of the global ion exchange resins market. Pharmaceutical, food & beverage, and electrical & electronics industries are projected to register the highest growth in the next five years, thereby boosting market growth. Increasing population, growing urbanization and evolving manufacturing sector, need for water conservation, and stringent regulations are the major factors that are projected to drive the ion exchange resins market during the forecast period. Furthermore, volatility in raw material prices and increasing competition from reverse osmosis process are the factors restraining the market growth.

“The other types segment is expected to register the highest CAGR of the overall ion exchange resins market during the forecast period.”

Chelation resins and adsorbent resins are included in the others segment. Chelation resins are commonly used to remove metals, such as lead, copper, and zinc, in the metal processing industries. Adsorbent resins are mainly used in industrial applications to modify physio-chemical characteristics of liquids. These resins are suitable for

adsorption of specific organic molecules from food and nonfood liquids. They have several applications in the food industry concerned with the removal of undesired organic substances and recovery of valuable organic substances.

“The ion exchange resins market in the power industry is projected to account for the largest share during the forecast period.”

The power industry has witnessed significant growth over the past few years, which is attributed to the growing demand for electricity from various countries. The governments, worldwide, are encouraging various industries, including food & beverage, chemical, and primary metal to reduce their carbon footprints and switch to renewable and nuclear energy sources. Nuclear energy is the second-fastest-growing source of energy. Various nuclear-related projects are estimated to be executed in the next 10 years across the globe, thereby, directly boosting the ion exchange resins market in the power industry. In addition, China and India are also increasing their presence in the nuclear power generation segment with the installation of various nuclear energy-based power plants. These trends are expected to boost the demand for ion exchange resins in power end-use industry during the forecast period.

“APAC ion exchange resins market is projected to register the highest CAGR during the forecast period.”

The APAC market is segmented into China, India, Japan, South Korea, Australia, Taiwan, Thailand, Indonesia, and Rest of APAC. China is the market leader in APAC for ion exchange resins. Major fuel sources in the country are fossils and renewables. High growth in electricity demand has given rise to power shortages, while the dependency on fossil fuels has led to increased air pollution. Hence, the government is planning to reduce its dependence on fossil fuels and hydro resources leading to the rise in the demand for nuclear energy, which, in turn, will boost the market of ion exchange resins in the country. Furthermore, with the growing nuclear industry, there has been a scarcity of freshwater, which is leading to high demand for ion exchange resins in the country.

In-depth interviews were conducted with Chief Executive Officers (CEOs), marketing directors, other innovation and technology directors, and executives from various key organizations operating in the ion exchange resins market, and information was gathered from secondary research to determine and verify the market size of several segments and subsegments.

By Company Type: Tier 1 – 60%, Tier 2 – 30%, and Tier 3 – 10%

By Designation: C Level – 30%, D Level – 60%, and Others – 10%

By Region: Europe – 20%, North America – 35%, APAC – 30%, South America-5%, and the Middle East & Africa – 10%

The key companies profiled in this report are DuPont de Nemours, Inc., (US), Lanxess (Germany), Purolite Corporation (US), Mitsubishi Chemical Corporation (Japan), Thermax Limited (India), Ion Exchange (India) Ltd. (India), Novasep Holding (France), Samyang Corporation (South Korea), ResinTech Inc., (US), and Bio-Rad Laboratories, Inc. (US).

Research Coverage:

This report provides a detailed segmentation of the ion exchange resins market based on type, application, end-use industry, and region. Based on type, the ion exchange resins market has been segmented into cationic resins, anionic resins, and others. Based on application, the market has been segmented into water and non-water. Based on end-use industry, the market has been segmented into power, chemical & petrochemical, food & beverage, pharmaceutical, electrical & electronics, metal & mining, and others. Based on region, the market has been segmented into APAC, Europe, North America, South America, and the Middle East & Africa.

Key Benefits of Buying the Report

From an insights perspective, this research report focuses on various levels of analyses — industry analysis (industry trends), market share analysis of top players, and company profiles, which together comprise and discuss the basic views on the competitive landscape; emerging and high-growth segments of the market; high-growth regions; and market drivers, restraints, opportunities, and challenges.

Contents

1 INTRODUCTION

- 1.1 OBJECTIVES OF THE STUDY
- 1.2 MARKET DEFINITION
 - 1.2.1 MARKET SCOPE
 - 1.2.2 REGIONS COVERED
 - 1.2.3 YEARS CONSIDERED FOR THE STUDY
- 1.3 CURRENCY
- 1.4 UNIT CONSIDERED
- 1.5 STAKEHOLDERS

2 RESEARCH METHODOLOGY

- 2.1 RESEARCH DATA
 - 2.1.1 SECONDARY DATA
 - 2.1.1.1 Key data from secondary sources
 - 2.1.2 PRIMARY DATA
 - 2.1.2.1 Key data from primary sources
 - 2.1.2.2 Key industry insights
 - 2.1.2.3 Breakdown of primary interviews
- 2.2 MARKET SIZE ESTIMATION
 - 2.2.1 BOTTOM-UP APPROACH
 - 2.2.2 TOP-DOWN APPROACH
- 2.3 DATA TRIANGULATION
- 2.4 ASSUMPTIONS
- 2.5 LIMITATIONS

3 EXECUTIVE SUMMARY

4 PREMIUM INSIGHTS

- 4.1 ATTRACTIVE OPPORTUNITIES IN THE ION EXCHANGE RESINS MARKET
- 4.2 ION EXCHANGE RESINS MARKET, BY TYPE
- 4.3 ION EXCHANGE RESINS MARKET, DEVELOPED VS. DEVELOPING COUNTRIES
- 4.4 APAC ION EXCHANGE RESINS MARKET, BY TYPE AND APPLICATION
- 4.5 ION EXCHANGE RESINS MARKET, BY KEY COUNTRIES

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

5.2.1 DRIVERS

5.2.1.1 Growing urban population in APAC

5.2.1.2 Increasing demand for nuclear electricity generation in emerging economies

5.2.1.3 Stringent environmental regulations

5.2.2 RESTRAINTS

5.2.2.1 Volatility in raw material prices

5.2.2.2 Increasing competition from reverse osmosis membrane technology

5.2.3 OPPORTUNITIES

5.2.3.1 Growing industrialization in emerging economies

5.2.3.2 Increasing importance of the recycle and reuse of water

5.2.4 CHALLENGES

5.2.4.1 Finding new applications

5.2.4.2 Lack of strict regulations in developing regions

5.3 PORTER'S FIVE FORCES ANALYSIS

5.3.1 THREAT OF NEW ENTRANTS

5.3.2 THREAT OF SUBSTITUTES

5.3.3 BARGAINING POWER OF BUYERS

5.3.4 BARGAINING POWER OF SUPPLIERS

5.3.5 INTENSITY OF COMPETITIVE RIVALRY

6 ION EXCHANGE RESINS MARKET, BY TYPE

6.1 INTRODUCTION

6.1.1 CATIONIC RESINS

6.1.1.1 Growing industrial sector driving the demand for cationic ion exchange resins

6.1.2 ANIONIC RESINS

6.1.2.1 Anionic ion exchange resins have high demand in water dealkalization, demineralization, and water softening

6.1.3 OTHERS

7 ION EXCHANGE RESINS MARKET, BY APPLICATION

7.1 INTRODUCTION

7.1.1 WATER

7.1.1.1 Growth of power, electrical & electronics, and metal & mining industries positively impacting the market

7.1.2 NON-WATER

7.1.2.1 The launch of innovative medicinal products to drive the pharmaceutical industry

8 ION EXCHANGE RESINS MARKET, BY END-USE INDUSTRY

8.1 INTRODUCTION

8.1.1 POWER

8.1.1.1 Stringent regulations on the treatment of wastewater discharged from power plants propelling the demand for ion exchange resins

8.1.2 CHEMICAL & PETROCHEMICAL

8.1.2.1 Domestic policy reforms, improving commodity prices, and the increasing presence of production facilities of various companies boosting the market

8.1.3 FOOD & BEVERAGE

8.1.3.1 Significant rise in preferences for healthy drinks such as juices, bottled water, and ready-to-drink tea to propel the market

8.1.4 PHARMACEUTICAL

8.1.4.1 Better drug retention and prevention of dose dumping and toxicity to drive the ion exchange resins market

8.1.5 ELECTRICAL & ELECTRONICS

8.1.5.1 Price erosion, higher per capita income, and rising consumer demand for electronics to drive the market in the segment

8.1.6 METAL & MINING

8.1.6.1 Ion exchange resins help in cleaning and obtaining pure metals

8.1.7 OTHERS

9 ION EXCHANGE RESINS MARKET, BY REGION

9.1 INTRODUCTION

9.2 APAC

9.2.1 CHINA

9.2.1.1 Modernization of the Chinese economy, coupled with changing lifestyle, impacting growth of end-use industries

9.2.2 INDIA

9.2.2.1 Increasing population, rapid urbanization, growing pressure on quality

maintenance of municipal water supplies, and stringent regulations to drive the market

9.2.3 JAPAN

9.2.3.1 Highly developed and efficient water treatment and reuse infrastructure significantly increasing the demand for ion exchange resins

9.2.4 SOUTH KOREA

9.2.4.1 Increase in domestic and industrial wastewater generation to boost the market growth

9.2.5 AUSTRALIA

9.2.5.1 Consumption of a considerable amount of ion exchange resins in huge mining industry

9.2.6 TAIWAN

9.2.6.1 Power is the largest end-use industry of ion exchange resins in the country owing to the large nuclear industrial base

9.2.7 THAILAND

9.2.7.1 Increased need for pure and safe water to drive the market

9.2.8 INDONESIA

9.2.8.1 Increased infrastructure funding and policy reforms to encourage private investment

9.2.9 REST OF APAC

9.3 NORTH AMERICA

9.3.1 US

9.3.1.1 Increasing demand for electricity to benefit the ion exchange resins market

9.3.2 CANADA

9.3.2.1 Growing nuclear industry and the presence of a vast mining sector in the country help boost the market demand

9.3.3 MEXICO

9.3.3.1 Expansion of the country's nuclear energy capacity will help increase the demand for ion exchange resins

9.4 EUROPE

9.4.1 RUSSIA

9.4.1.1 Large power industry in Russia boosting the demand for ion exchange resins

9.4.2 FRANCE

9.4.2.1 Economic dynamism, high level of labor productivity, and the presence of large international companies driving the market

9.4.3 GERMANY

9.4.3.1 Strong manufacturing base, skilled labor, and balanced industrial growth to

drive the market

9.4.4 UK

9.4.4.1 New and under-construction nuclear power plants are likely to boost the market demand

9.4.5 ITALY

9.4.5.1 Accelerating foreign demand to propel the market growth

9.4.6 SPAIN

9.4.6.1 Increasing stringent regulations for water treatment and large industrial base of the country driving the market

9.4.7 NETHERLANDS

9.4.7.1 Pharmaceutical, chemicals, and electrical & electronics industries to grow in the country owing to an increase in investments

9.4.8 REST OF EUROPE

9.5 SOUTH AMERICA

9.5.1 BRAZIL

9.5.1.1 Almost 90% of the country's electricity is produced from renewable sources, increasing the scope of ion exchange resins

9.5.2 ARGENTINA

9.5.2.1 Economic transformation in the country promoting sustainable economic development to benefit the market

9.5.3 REST OF SOUTH AMERICA

9.6 MIDDLE EAST & AFRICA

9.6.1 SAUDI ARABIA

9.6.1.1 The country's demand for electricity is growing rapidly

9.6.2 SOUTH AFRICA

9.6.2.1 The country is politically stable and has abundant natural resources, R&D capabilities, and an established manufacturing base

9.6.3 TURKEY

9.6.3.1 Growing electricity demand in the country will boost the market for ion exchange resins

9.6.4 REST OF MIDDLE EAST & AFRICA

10 COMPETITIVE LANDSCAPE

10.1 OVERVIEW

10.2 MARKET RANKING, 2019

10.3 COMPETITIVE LEADERSHIP MAPPING, 2019

10.3.1 VISIONARY LEADERS

10.3.2 INNOVATORS

- 10.3.3 DYNAMIC DIFFERENTIATORS
- 10.3.4 EMERGING COMPANIES
- 10.4 STRENGTH OF PRODUCT PORTFOLIO
- 10.5 BUSINESS STRATEGY EXCELLENCE
- 10.6 COMPETITIVE SCENARIO
 - 10.6.1 MERGER & ACQUISITION
 - 10.6.2 INVESTMENT & EXPANSION
 - 10.6.3 PARTNERSHIP & COLLABORATION
 - 10.6.4 NEW PRODUCT DEVELOPMENT
- 10.7 ION EXCHANGE RESINS: PATENT ANALYSIS
 - 10.7.1 METHODOLOGY
 - 10.7.2 DOCUMENT TYPE
 - 10.7.3 INSIGHT
 - 10.7.4 TOP APPLICANTS
 - 10.7.4.1 Kurita Water Industries Ltd.
 - 10.7.4.2 Sumitomo Metal Mining Co., Ltd.
 - 10.7.4.3 Tris Pharma, Inc.
 - 10.7.5 DISCLAIMER

11 COMPANY PROFILES

(Business Overview, Products Offered, Recent Developments, SWOT Analysis, Right to win)*

- 11.1 DUPONT DE NEMOURS, INC.
- 11.2 PUROLITE CORPORATION
- 11.3 LANXESS AG
- 11.4 MITSUBISHI CHEMICAL CORPORATION
- 11.5 THERMAX LIMITED
- 11.6 ION EXCHANGE (INDIA) LTD.
- 11.7 BIO-RAD LABORATORIES, INC.
- 11.8 NOVASEP HOLDING
- 11.9 SUNRESIN NEW MATERIALS CO. LTD.
- 11.10 SUQING GROUP
- 11.11 SAMYANG CORPORATION
- 11.12 RESINTECH INC.
- 11.13 EVOQUA WATER TECHNOLOGIES LLC
- 11.14 OTHER KEY COMPANIES
 - 11.14.1 ANHUI SANXING RESIN TECHNOLOGY CO. LTD.
 - 11.14.2 AUCHTEL PRODUCTS LIMITED

11.14.3 ALDEX CHEMICAL COMPANY LIMITED

11.14.4 BENGBU DONGLI CHEMICAL CO., LTD.

11.14.5 EICHROM TECHNOLOGIES INC.

11.14.6 FINEX OY

11.14.7 HEBI JUXING RESIN CO., LTD.

11.14.8 JACOBI CARBONS AB GROUP

11.14.9 JIANGSU LINHAI RESIN SCIENCE AND TECHNOLOGY CO. LTD.

11.14.10 NINGBO ZHENGQUANG RESIN CO., LTD.

11.14.11 OVIVO

11.14.12 TIANJIN NANKAI HECHENG SCIENCE & TECHNOLOGY CO., LTD.

*Details on Business Overview, Products Offered, Recent Developments, SWOT Analysis, Right to win might not be captured in case of unlisted companies.

About

The report "Ion Exchange Resins Market by Type (Cationic Resins, Anionic Resins), End-Use Industry (Power, Chemical & Petrochemical, Pharmaceutical, Food & Beverage, Metal & Mining, Electrical & Electronics), and Region - Global Forecast to 2022" The ion exchange resins market is projected to grow from USD 1.26 Billion in 2017 to USD 1.56 Billion by 2022, at a CAGR of 4.4% from 2017 to 2022. Growing urbanization and increasing affluence in the APAC region and the increasing use of nuclear energy for electricity generation in emerging economies are the major drivers for the ion exchange resins market. In addition, stringent environmental regulations in many countries are also expected to drive the ion exchange resins market during the forecast period.

Major manufacturers profiled in this report include

DowDuPont (US), Lanxess AG (Germany), Mitsubishi Chemical Corporation (Japan), Ion Exchange (India) Ltd. (India), and Purolite Corporation (US) among others. The report also includes detailed information about various growth strategies adopted by these key players to strengthen their position in the ion exchange resins market.

The objective of this study is to define, describe, and forecast the ion exchange resins market based on various segmentations and strategically analyze these market segments with respect to individual growth trends, growth prospects, and contribution to the overall ion exchange resins market. In this report, the ion exchange resins market has been segmented based on type, end-use industry, and region.

Investments & expansions was the key strategy adopted by the major players to strengthen their position in the ion exchange resins market between 2013 and 2018. Investments & expansions accounted for a share of 35.5% of the total growth strategies adopted by the leading players of the ion exchange resins market between 2013 and 2018. Companies operating in the ion exchange resins market have also adopted the strategy of new product and technology development which helped them fulfill the emerging need for ion exchange resins in various industries.

DowDuPont (US) has gained a strong foothold in the ion exchange resins market. It is focusing on organic growth and has enhanced its product portfolio through various growth strategies, such as new product and technology developments and investments & expansions, to meet the growing demand from customers. In 2013, the company

inaugurated a new technical center in the premises of the Moscow Power Engineering Institute (MPEI), together with the Research and Production Company (RPC) Mediana-Filter, that serves as a facility for plant engineers training and engineering and scientific research. In 2013, the company signed an agreement with Ahlstrom Corporation (Finland), a global high-performance fiber-based materials company, to use the Ahlstrom Disruptor technology for drinking water applications. The agreement will help the company expand its ion exchange resins product portfolio.

Lanxess AG (Germany) is another major player operating in the ion exchange resins market. The company has a broad product portfolio for ion exchange resins which find applications in various industries. The company has 54 production sites across the globe, which help the company attain economies of scale. The company is also adopting various growth strategies such as investments & expansions and new product developments to expand its presence worldwide. For instance, in September 2014, the company invested USD 12.5 million in its new production line in Leverkusen, Germany.

Cationic resins segment to lead the ion exchange resins market during the forecast period

Based on type, the cationic resins segment is projected to lead the ion exchange resins market during the forecast period. Cationic resins are commodity resins, extensively used for water softening and demineralization applications in various end-use industries, such as nuclear, water & wastewater treatment, and chemical & petrochemical, which is leading to the high growth of the ion exchange resins market.

Electrical & electronics end-use industry segment projected to grow at the highest CAGR during the forecast period

Based on end-use industry, the electrical & electronics segment is projected to grow at the highest CAGR from 2017 to 2022. Ion exchange resins are receiving considerable attention as the industry needs ultrapure water to prevent the contamination of products during manufacture which would otherwise lead to low yield of electronic devices. In addition, factors such as price erosion; higher per capita income; and rising consumer demand for smartphones, tablets, and wearable electronics are also expected to drive the industry and subsequently the consumption of ultrapure water. The R&D departments of manufacturing companies are carrying out research to widen the application areas of ion exchange resins, which is expected to drive the ion exchange resins market during the forecast period.

APAC ion exchange resins market projected to grow at the highest CAGR from 2017 to 2022

The ion exchange resins market in the APAC region possesses immense potential for growth. Increasing demand for nuclear electricity and the growing urbanization and increasing affluence in the region are expected to fuel the demand for ion exchange resins during the forecast period. China, India, Japan, and South Korea are some of the key countries in the region contributing significantly towards the growth of the ion exchange resins market in the APAC region.

I would like to order

Product name: Ion Exchange Resins Market by Type (Cationic Resins, Anionic Resins), Application (Water, Non-Water), End-Use Industry (Power, Chemical & Petrochemical, Pharmaceutical, Food & Beverage), and Region - Global Forecast to 2025

Product link: <https://marketpublishers.com/r/I0A0D5F38A1EN.html>

Price: US\$ 5,650.00 (Single User License / Electronic Delivery)
