## **Abstracts**

“Isobutyl Stearate market is projected to reach USD 182.3 million by 2026”

The global isobutyl stearate market is projected to reach USD 182.3 million by 2026, at a CAGR of 4.8% from 2016 to 2026. The increasing consumption of isobutyl stearate in the metalworking, personal care, and industrial applications is driving the growth of the global isobutyl stearate market. The future demand for isobutyl stearate is expected to be hampered due to certain regulatory challenges, concerned with the use of isobutyl stearate in some countries, for example the limitation in the use of isobutyl stearate in some countries in Europe. This is a major restraint for the global isobutyl stearate market.

“Metalworking segment to register highest growth in the isobutyl stearate market”

The metalworking industry is the largest consumer of isobutyl stearate. Owing to its growing consumption for the copper, steel and aluminum application segment, the demand for isobutyl stearate is expected to rise in this period. Apart from metalworking, the demand for isobutyl stearate in personal care and industrial applications is also expected to increase.

The isobutyl stearate market in the Asia-Pacific region is projected to grow at the highest CAGR during the forecast period

The Asia-Pacific isobutyl stearate market is anticipated to grow at the highest CAGR

from 2016 to 2026. Growth in this market is attributed to the increasing demand for isobutyl stearate applications. China and Japan in the Asia-Pacific region, are the two major countries expected to register the highest CAGR during the forecast period.

The growth in these two countries is mainly due to the growing demand for isobutyl stearate in personal care and metalworking products. One of the major producers of isobutyl stearate in this region is, Hangzhou DayangChem Co., Limited.
