Abstracts

The ITSM market size is expected to grow from USD 10.5 billion in 2023 to USD 22.1 billion by 2028 at a Compound Annual Growth Rate (CAGR) of 15.9% during the forecast period. The market has excellent growth opportunities, such as increasing government initiatives for digital transformation and the emergence of AI to automate processes. Service management solutions with AI capabilities can automate the tagging of digital assets, such as images, text, and videos, by assigning relevant keywords or metadata based on their content. This automation allows for quick digital asset identification, classification, and retrieval. AI also helps extract metadata from digital assets, perform forensic analysis, and ensure compliance with copyright laws.

“By organization size, the SMEs segment to grow at the highest CAGR during the forecast period.”

An organization having less than 1,000 employees can be termed an SME. Since ITSM offers SMEs cost savings, scalability, and flexibility, the market for SMEs is anticipated to grow. For SMEs, cloud-based technology will improve business efficiency, targeted results, and more revenues. SMEs, however, confront three significant obstacles: scalability, skills, and funding. Pay-as-you-go models, which provide flexibility in managing their IT infrastructure per their needs, are used by SMEs as a solution to these problems. SMEs are up against fierce competition from larger businesses; therefore, to obtain a competitive advantage, SMEs are using ITSM solutions. These solutions allow for prompt replies, well-timed decisions, and increased productivity. It is

anticipated that the use of ITSM will grow in the future as more businesses move their workloads to cloud-based environments.

“By deployment model, the Cloud segment to have a higher market share during the forecast period. “

Cloud-based ITSM solutions involve deploying ITSM software on remote servers maintained by a third-party provider. This model offers unparalleled scalability, accessibility, and flexibility, allowing organizations to access ITSM tools and resources from anywhere with an internet connection. Cloud solutions eliminate the need for extensive on-site infrastructure, reducing capital expenditures and providing a pay-as-you-go subscription model. The cloud enables rapid deployment, quick scalability to accommodate changing workloads, and seamless updates managed by the service provider.

“By vertical, the IT & ITeS segment is projected to record the highest market share during the forecast period.”

The IT and ITeS verticals have grown significantly in the last few years. ITeS firms have implemented several strategies to stabilize their declining profit margins, including infrastructure sharing, revenue assurance, business processes, IT outsourcing, and infrastructure reduction. To ensure these actions are practical, it is crucial to guarantee the efficacy of the IT services that support them. In the ITeS industry, cloud management is done in a complex manner where the prime focus is on the customer's needs rather than the business. ITSM solutions are helping organizations' IT to mature to the level of IT governance aligned with the overall corporate strategy, which would further drive business performance.

The breakup of the profiles of the primary participants is below:

By Company Type: Tier I: 29%, Tier II: 45%, and Tier III: 26%

By Designation: C-Level Executives: 30%, Director Level: 25%, and *Others: 45%

By Region: North America: 40%, Europe: 30%, Asia Pacific: 25%, **RoW: 5%

* Others include sales managers, marketing managers, and product managers

****RoW include Middle East & Africa and Latin America**

Note: Tier 1 companies have revenues of more than USD 100 million; tier 2 companies' revenue ranges from USD 10 million to USD 100 million; and tier 3 companies' revenue is less than 10 million

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

Some of the key players operating in the ITSM market are – Dell Technologies (US), Vertiv (US), Schneider Electric (France), IBM (US), Huawei (China), Eaton (Ireland), Rittal (Germany), HPE (US), Silent-Aire (Canada), and Eltek (Norway).

Research coverage:

The market study covers the ITSM market across segments. It aims to estimate the market size and the growth potential across different segments such as offering, deployment model, organization size, vertical, and region. It includes an in-depth competitive analysis of the key players in the market, their company profiles, key observations related to product and business offerings, recent developments, and key market strategies.

Reasons to buy this report:

The report will help the market leaders/new entrants with information on the closest approximations of the revenue numbers for the overall ITSM market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and plan suitable go-to-market strategies. The report also helps stakeholders understand the market pulse and provides information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

Analysis of key drivers, restraints, opportunities, and challenges influencing the growth of the ITSM market.

Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product & service launches in the ITSM market.

Market Development: Comprehensive information about lucrative markets – the report analyses the ITSM market across varied regions.

Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the ITSM market.

Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players like ServiceNow, BMC Software, Broadcom, Ivanti, and ManageEngine in the ITSM market.

FIGURE 18 ITSM MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

5.2.1 DRIVERS

- 5.2.1.1 Increasing shift to cloud-based technologies
- 5.2.1.2 Simplification and synchronization of IT resources
- 5.2.1.3 Automated management of IT processes and policies
- 5.2.1.4 Benefits of agile implementation, easy deployment, and OPEX model

5.2.2 RESTRAINTS

- 5.2.2.1 Lack of technical knowledge and expertise
- 5.2.2.2 Security and privacy concerns for confidential data and business processes

5.2.3 OPPORTUNITIES

- 5.2.3.1 Widespread adoption of BYOD trend and increasing mobile workforce
- 5.2.3.2 Increasing government initiatives for necessary technology usage
- 5.2.3.3 Continuous developments in 5G technology
- 5.2.3.4 Emergence of AI to automate processes

5.2.4 CHALLENGES

- 5.2.4.1 Effective workforce management
- 5.2.4.2 Cybersecurity concerns arising out of breaches

5.3 CASE STUDY ANALYSIS

5.3.1 CASE STUDY 1: TECNOLÓGICO DE MONTERREY DEPLOYED ITSM SOLUTIONS TO REVOLUTIONIZE USER EXPERIENCE

5.3.2 CASE STUDY 2: NEXTIVA DEPLOYED ATlassian's JIRA SERVICE MANAGEMENT TO ACHIEVE EFFECTIVE SERVICE PROVISION

5.3.3 CASE STUDY 3: WILDBERRIES ADOPTED AXIOS ASSIST TO ENHANCE AND OPTIMIZE BUSINESS SUPPORT PROCESS(ES) TO INCREASE REVENUE

5.3.4 CASE STUDY 4: TELEFÓNICA DEPLOYED BMC SOFTWARE'S SOLUTIONS TO ACHIEVE IMPROVED SOFTWARE ASSET MANAGEMENT

5.3.5 CASE STUDY 5: ALGAR TECH IMPLEMENTED BROADCOM'S SOLUTIONS TO LEVERAGE ITSM SERVICE PROVISION FOR OPTIMAL PRODUCTION AND BUSINESS GROWTH
