Abstracts

According to MarketsandMarkets, the global lactase market is estimated to be valued at USD 247 million in 2022. It is projected to reach USD 336 million by 2027, at a CAGR of 6.3%, in terms of value, between 2022 and 2027. The market is gaining momentum with increasing awareness about lactose intolerance and lactase deficiency leading to symptoms such as diarrhea, nausea, stomach cramps, flatulence, etc. Consumers diagnosed with this condition have difficulty digesting lactose and the rising prevalence of health issues due to the consumption of milk and dairy products has resulted in the demand and consumption of lactose-free products leading to an increase in lactase enzyme demand. Key players in the market are working to provide a sustainable solution either through new product launches or by deals such as partnerships and acquisitions. This helps different players to bring their expertise and cater to the growing demands in the lactase market.

“By source, the yeast segment occupies the largest market share during the forecast period in terms of values.”

Based on the source, the yeast segment is estimated to occupy the largest market share during the forecast period. Lactase enzyme is extracted from different sources like bacteria, fungi, and yeast. Yeast is one of the major sources for the extraction of lactase enzyme. *Kluyveromyces lactis* and *Kluyveromyces fragilis* (*Saccharomyces*

fragilis) are recognized as safe” (GRAS) by the Food & Drug Administration (FDA). Therefore, lactase enzyme sourced from yeast finds major applications in the food & beverage industry, especially in the dairy industry.

“By form, the liquid segment is forecasted to account for the largest market share in terms of values.”

Based on form, the liquid segment accounts for the largest market share, and it will dominate the market in terms of value during the forecast period. The liquid form of lactase enzyme is lucid and allows a proper blending of ingredients and improved biological reaction. It is directly used in liquid form or sprayed and absorbed on a solid carrier.

“By application, the pharmaceutical products & dietary supplements is the fastest-growing segment during the forecast period.”

Based on application, the pharmaceutical products & dietary supplements segment accounts for the largest market share in 2022. Medicines containing lactase are available in the market for lactose-intolerant consumers. These medicines are taken before consuming milk or milk products. Lactase enzyme has different applications in the pharmaceutical industry from being used as an excipient in tablets to chewable lactase tablets for people suffering from lactose intolerance. These lactase supplements not only help in overcoming symptoms of lactose intolerance but also help in meeting other dietary calcium needs by increasing dairy intake.

“Asia Pacific is growing at the highest rate for the lactase market during the forecast period.”

Asia Pacific is estimated to grow with the highest CAGR during the forecast period in the lactase market, growing between 2022 and 2027. The region is dominated by large-scale operations, primarily focused on exports, with an organized distribution chain. The innovative product development in the region is backed by appropriate research and development facilities available. China is projected to be the largest lactase market in the Asia Pacific during the forecast period. The increasing level of awareness regarding the benefits of lactose-free products and the lactose-intolerant population in the country is inclined toward consuming lactase enzymes through tablets and liquid drops which boosts the lactase market. Additionally, the region also offers a lucrative opportunity for companies to set up manufacturing plants due to the availability of raw materials, low-cost labor, etc.

Break-up of Primaries

By Company Type: Tier 1 – 30%, Tier 2 – 45%, and Tier 3 – 25%

By Designation: Manager – 50%, CXOs – 25%, and Executives – 25%

By Region: Asia Pacific – 40%, Europe – 25%, North America – 25%, and RoW – 10%

Leading players profiled in this report include the following:

CHR. Hansen Holdings A/S (Denmark)

Kerry Group plc. (Ireland)

Koninklijke DSM N.V. (the Netherlands)

Novozymes A/S (Denmark)

Merck KGaA (Denmark)

IFF (US)

Amano Enzymes (Japan)

Advanced Enzymes (India)

Novact Corporation (US)

Antozyme Biotech Pvt. Ltd (India)

Nature Biosciences Pvt. Ltd (India)

Aumgene Biosciences (India)

Creative Enzymes (US)

Biolaxi Enzymes Pvt. Ltd (India)

Enzyme Biosciences Pvt. Ltd (India)

Infinita Biotech (India)

Mitushi Biopharma (India)

Oenon Holdings Inc. (Japan)

Ultreze Enzymes (India)

Senson (Finland)

Research Coverage

This report segments the lactase market based on source, form, application, and region. In terms of insights, this research report focuses on various levels of analyses—competitive landscape, pricing insights, segment analysis, and company profiles—which together comprise and discuss the basic views on the emerging & high-growth segments of the lactase market, high-growth regions, countries, industry trends, drivers, restraints, opportunities, and challenges.

Reasons to buy this report

To get a comprehensive overview of the lactase market

To gain wide-ranging information about the top players in this industry, their product portfolio details, and the key strategies adopted by them

To gain insights into the major countries/regions in which the lactase market is flourishing

Contents

1 INTRODUCTION

1.1 STUDY OBJECTIVES

1.2 MARKET DEFINITION

1.2.1 INCLUSIONS AND EXCLUSIONS

1.3 STUDY SCOPE

FIGURE 1 MARKET SEGMENTATION

1.3.1 REGIONS COVERED

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.1.1 MACROECONOMIC FACTOR

5.1.1.1 Increase in incidences of lactase deficiency

FIGURE 16 COUNTRY-WISE PREVALENCE OF LACTOSE INTOLERANCE, 2020

5.2 MARKET DYNAMICS

FIGURE 17 LACTASE MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

5.2.1 DRIVERS

5.2.1.1 Growing lactose intolerance in infants and adults

5.2.1.2 Growth in technological advancements in end-user applications

5.2.1.3 Increasing awareness among people about food allergies

5.2.2 RESTRAINTS

5.2.2.1 Rising preference for dairy-free alternatives and vegan diets

5.2.2.2 Differences in regulatory framework across regions

5.2.3 OPPORTUNITIES

5.2.3.1 Increasing demand for lactase for producing lactose-free products

5.2.3.2 Enhanced research and development to find new sources of lactase extraction and enzyme application

5.2.4 CHALLENGES

5.2.4.1 High processing cost and lack of technical expertise

5.2.4.2 Concerns over adulteration and quality of enzymes used
