“Medical packaging market projected to grow at a CAGR of 6.29%”

The medical packaging market is projected grow from USD 35.31 billion in 2016 to USD 50.55 billion by 2022, at a compound annual growth rate (CAGR) of 6.29% from 2017. The medical packaging market has been growing as a result of changes in lifestyle, increase in disposal income, and advancements in medical technology. The cost-effectiveness of medical packaging and emphasis on modern technologies in the packaging industry have prompted a rise in demand for medical packaging. Fluctuations in the prices of raw material have resulted in an unfavorable impact on the profitability of the medical packaging industry. Environmental issues and fluctuations in oil and resin prices have added to the cost pressure on raw material providers of medical packaging. The source of the price rise includes increase in crude oil prices caused by the numerous geopolitical problems, in addition to stringent environmental regulations and some shortage in supply.

This segment is witnessing high growth due to a variety of reasons such as recyclability, cost-effectiveness, and its ease of usability.

“North America expected to have the largest market share in 2016; Asia-Pacific is projected to witness fastest growth during the forecast period”

North America accounted for the largest market in 2016. The reasons for its dominance in the global medical packaging market are high technological development, high disposable income, excellent healthcare & medical facilities, and strict FDA regulations.
