Abstracts

The market size of MMA adhesives is estimated at USD 1.09 billion in 2018 and is projected to reach USD 1.56 billion by 2023, at a CAGR of 7.5%. The increasing demand for MMA adhesives from the automotive & transportation industry is one of the major drivers for the market. Automotive & transportation is the largest application because of the increasing use of advanced materials for component manufacturing, which develops a need for bonding technology that can bond dissimilar materials with adjustable assembly time. Metal is the largest substrate, in terms of value, and is expected to dominate the market in the future.

The composite segment is projected to register the highest CAGR during the forecast period

Composite is projected to be the fastest-growing substrate segment of the global MMA adhesives market, in terms of value. This high growth can be attributed to the growing demand for MMA adhesives for bonding composite components, such as deflectors, bumpers, roofs, composite tanks, blades, car seats, interior body panel structures, and instrument panels of trucks, cars, rails, buses, and tanks.

The automotive & transportation end-use industry segment is projected to register the highest CAGR during the forecast period

The MMA adhesives market in the automotive & transportation end-use industry is

projected to register the highest CAGR, in terms of value, during the forecast period. This is due to the increasing penetration of MMA adhesives as a technology for bonding composites to metals and metals to metal components. MMA adhesives offer the benefit of bonding materials having different strength and different coefficient of thermal expansion. It distributes the load evenly to the entire bonding area. MMA adhesives require minimal or no surface preparation along with the benefits of excellent stress resistance, superior toughness, endurance, and excellent impact resistance.

By region, the MMA adhesives market in APAC is projected to register the highest CAGR during the forecast period

APAC is projected to be the fastest-growing MMA adhesives market, mainly driven by the demand from the automotive & transportation, wind energy, and marine end-use industries. Automotive & transportation is one of the major end-use industries of MMA adhesives in this region. The economic growth in APAC, particularly in emerging markets such as India, Taiwan, Indonesia, Malaysia, Thailand, and Vietnam, is contributing to the increase in the number of infrastructure projects, which is expected to drive the demand for MMA adhesives in the building & construction end-use industry.
