Abstracts

Mobile Acceleration aims at accelerating and optimizing the web, content, network and mobile applications, in order to improve business strength and user quality of experience (QoE). The technology helps network providers to overcome problems such as latency, round trip time (RTT) and improves scalability, availability and performance, thereby minimizing complexity for mobile users. Increase in the worldwide data consumption, combined with the escalating need for mobility has led to the migration of desktop users to mobile-based platforms.

Global mobile data traffic and the penetration of mobile devices is expected to soar in the near future, thereby driving the mobile acceleration market furthermore. The global market for mobile acceleration is expected to grow from \$ 402.4 million in 2012 to \$3.36 Billion by 2018, at a CAGR of 42.49%.

The report is segmented based on type of mobile devices, type of mobile acceleration, type of mobile content, spanning across five major geographies including North America(NA), Europe, Middle East & Africa(MEA) and Latin America (LA). The report also profiles major market players in the mobile acceleration space such as Akamai Technologies, F5 Networks Inc, Yottaa Inc, Riverbed Technology Inc, Circadence, Nokia Siemens Networks, Mobixell Networks Inc, Juniper Networks Inc, Limelight Networks Inc, Huawei Technologies Co Ltd, Flash Networks Inc, Propel Software Corporation, amongst others.
