Abstracts

The network switches market is projected to grow from USD 33.0 billion in 2023 and is projected to reach USD 45.5 billion by 2028; it is expected to grow at a CAGR of 6.6 % from 2023 to 2028.

The need for simplified networking communication management and automation and growing investments in digital platforms coupled with the augmented global demand for data centers is expected to fuel the growth of the network switches market. However, high operational cost of network switches limiting the growth of the network switches market.

“Large Enterprise or Private Cloud segment to hold the largest share of the network switches market for data center during the forecast period.”

The network switches market for data center end-user segment is includes into telecom service providers, cloud service providers and large enterprises or private cloud. A large majority of enterprises use or are planning to use hybrid cloud infrastructure to maintain tight control over mission-critical data. As a result, for several enterprises, the hybrid cloud runs in multiple different types of data centers. Connecting to a hybrid cloud means connecting many or all these types of data centers, thereby pushing the need for network switching solutions. Growing penetration of digital services across several industry verticals has resulted in the increased demand for data centers for storage, computing, and network management. This, in turn, will propel the demand for network

switches.

“Market for 100 MBE & 1 GBE switching port segment is expected to account for largest share during the forecast period”

The market for 100 MBE & 1 GBE switching port segment is expected to account for largest share of the network switches market during the forecast period. This can be attributed to the increasing adoption of 100 MBE & 1 GBE switching ports in non-data center applications like small businesses, campuses of universities and k-12 schools. For many small businesses, a 1 GbE switch is sufficient when transferring data. These devices support a bandwidth of up to 1000Mbps which is a drastic improvement on the 100Mbps of Fast Ethernet.

“Market for telecom service providers of the data center segment to exhibit highest growth during the forecast period ”

Significant growth in the telecommunications industry across the globe is one of the key factors driving the growth of the network switches market. The increasing need for advanced high-availability switching for network infrastructure is also providing a boost to market growth. Telecommunication systems have rapidly transformed with increasing demand for data connectivity in the last few years. Managing these systems has become tedious not only in infrastructure and functionality management but also in scope management. With the help of network switches, one can keep track of telecom infrastructure and provide real-time visibility and makes remote troubleshooting possible.

“Europe to hold a significant share of the network switches market during the forecast period”

Europe is expected to hold a significantly large share for network switches market during the forecast period. The countries that constitute a major portion of the network switches market in Europe include the Germany, UK, Italy. The European network switch market is expected to witness significant growth opportunities, as the major players in the region are focusing on expanding their presence in various verticals. The rising adoption of cloud-based services is helping in the growth of retail and wholesale colocation services in the market. The market is witnessing increased demand for colocation spaces across existing and upcoming data centers. The increase in the demand for colocation spaces is in turn likely to provide a boost to the adoption of network switches for enhancing connectivity.

The report profiles key players in the network switches market with their respective market ranking analysis. Prominent players profiled in this report are include are Cisco Systems (US), Huawei Technology (China), HPE Aruba (US), Juniper Networks (US), Arista Networks (US), NETGEAR (US), D-Link Corporation (US), Extreme Networks (US), NVIDIA Corporation (US), TRENDnet (US), Lantronix (US). Apart from this, Alcatel Lucent Enterprise (France), Dell Technologies (US), Pica8, Inc. (US), Larch Networks (US), STORDIS (Germany), IP Infusion (US), Buffalo Americas, Inc. (US), Linksys (US), TELEFLY Telecommunications Equipment Co., Ltd. (China), Allied Telesis (Japan), Moxa (Taiwan)

Research Coverage:

This research report categorizes the network switches market on the basis of type, switching port, end user, and region. The report describes the major drivers, restraints, challenges, and opportunities pertaining to the network switches market and forecasts the same till 2028. Apart from these, the report also consists of leadership mapping and analysis of all the companies included in the network switches ecosystem.

Key Benefits of Buying the Report

The report would help leaders/new entrants in this market in the following ways:

1. This report segments the network switches market comprehensively and provides the closest market size projection for all subsegments across different regions.
2. The report helps stakeholders understand the pulse of the market and provides them with information on key drivers, restraints, challenges, and opportunities for market growth.
3. This report would help stakeholders understand their competitors better and gain more insights to improve their position in the business. The competitive landscape section includes competitor ecosystem, product developments and launches, partnerships, and mergers and acquisitions.
4. The analysis of the top 25 companies, based on the market rank as well as the product footprint will help stakeholders visualize the market positioning of these key players.
5. Patent analysis, trade data, and technological trends that will shape the market in the coming years has also been covered in this report.

10.2.2.3 Use case: Fresno Pacific University (US) used network switches from HPE Aruba to streamline deployment and management of its networking infrastructure

10.2.2.4 Use case: Sheraton Hotels & Resorts leveraged switching solution from D-Link Corporation to address networking needs

10.2.3 CANADA

10.2.3.1 Canada to hold significant share of North American market during forecast period

10.2.3.2 Use case: Canada-based internet service provider leveraged network switches from NETGEAR to facilitate network expansion

10.2.4 MEXICO

10.2.4.1 Expanding telecommunications industry to drive market

10.3 EUROPE

10.3.2 UK

10.3.2.1 Presence of numerous data centers to foster market growth

10.3.2.2 Use case: Hawk-Eye (UK) chose Netgear's switching solutions for network connectivity

10.3.2.3 Use case: Aneurin Bevan University (UK) leveraged Cisco's Catalyst switches for network upgrade

10.3.2.4 Use case: University of Reading (UK) leveraged Juniper's EX Series Ethernet Switches to upgrade its campus network

10.3.3 GERMANY

10.3.3.1 Focus on development of 6G to create opportunities for network switch vendors

10.3.3.2 Use case: Daimler AG (Germany) created blueprint for global data centers with Cisco's Nexus 9000 Switches

10.3.3.3 Use case: Airbus Helicopter (Germany) deployed network switches to upgrade its data center

10.3.4 ITALY

10.3.4.1 Growing cloud investments to create opportunities for deployment of network switches

10.3.4.2 Use case: Kuwait Petroleum Italia (Italy) leveraged network switches from D-Link Corporation for its networking solution

10.3.5 FRANCE

10.3.5.1 Increasing focus on 5G rollout to contribute to market growth

10.3.5.2 Use case: Gamestream (France) scaled its Gaming-as-a-Service Solution with Netgear's M4300 switches

10.3.6 SPAIN

10.3.6.1 Public cloud adoption to push market growth

10.3.7 REST OF EUROPE

10.3.7.1 Use case: D-Link collaborated with aQuestora to provide switches for consumer glass fiber network

10.3.7.2 Use case: Colruyt Group (Belgium) selected Juniper Networks' switches to support its digital transformation

10.4 ASIA PACIFIC

10.4.2 CHINA

10.4.2.1 China to dominate network switches market in Asia Pacific during forecast period

10.4.2.2 Use case: Sunwah Kingsway (Hong Kong, China) leveraged network switches from H3C (China) to simplify its network infrastructure

10.4.3 JAPAN

10.4.3.1 Demand for high bandwidth to propel market growth

10.4.3.2 Use case: Rakuten Mobile built world's first cloud-native, software-defined 5G network

10.4.4 INDIA

10.4.4.1 Unprecedented increase in data consumption to fuel demand for network switches

10.4.4.2 Use case: Deployment of Layer 2 Metro Ethernet switches for Indian Railways

10.4.5 SOUTH KOREA

10.4.5.1 Increasing focus on 5G rollout to drive market

10.4.5.2 Use case: SK Telecom (South Korea) leveraged network switches offered by Arista Networks (US) for building its data center network

10.4.6 REST OF ASIA PACIFIC

10.4.6.1 Use case: Doane University (Australia) leveraged network switches from Aruba Networks for network upgrade

10.4.6.2 Use case: Vessel Instrument Networks (Australia) leveraged Moxa's network switches for network building

10.4.6.3 Use case: EVA Air (Taiwan) deployed switches from Juniper Networks to simplify its networks

10.5 REST OF THE WORLD

10.5.2 MIDDLE EAST & AFRICA

10.5.2.1 Adoption of cloud services to foster market growth

10.5.2.2 Use case: Dur Hospitality (Saudi Arabia) deployed Huawei's network switches to improve network performance

10.5.3 SOUTH AMERICA

10.5.3.1 South America to hold larger share of RoW network switches market during forecast period

10.5.3.2 Use case: Instituto Tecnológico Metropolitano (ITM) (South America) leverages PoE-enabled installation switches
