Abstracts

The market size for Global Organic peroxide Market size is projected to grow from USD 1.9 billion in 2023 to USD 2.6 billion by 2030, at a CAGR of 4.2% from 2023 to 2030.

The organic peroxide market is experiencing robust growth driven by expanding applications in industries such as plastics, rubber, polymers, and coatings. One key driver is the rising demand for polymerization reactions in the production of plastics and rubber-based products. The increasing focus on sustainable and eco-friendly materials has also led to a surge in demand for organic peroxides in the development of sustainability solutions in wind and solar energy. However, a notable challenge facing the market is the inherent hazard associated with the reactivity of organic peroxides, necessitating stringent safety measures in handling and storage. An opportunity lies in the development of safer and more stable formulations, addressing these safety concerns and opening avenues for broader applications in diverse industries, ultimately propelling the organic peroxide market further.

“By Type, Diacyl peroxide segment to account for highest growth rate.”

The diacyl peroxide segment, notably exemplified by benzoyl peroxide, is experiencing unprecedented growth in the organic peroxide market due to its widespread use and diverse applications. Benzoyl peroxide, a prominent diacyl peroxide derivative, has found extensive utility as a radical initiator in polymerization processes for plastics and rubber manufacturing. Moreover, its effectiveness in acne medication has fueled its

demand in the pharmaceutical and cosmetic industries. The versatility of diacyl peroxides extends to their role as cross-linking agents in the production of various materials, contributing to their increased adoption across different sectors. As industries continue to explore novel applications and formulations, the inherent reactivity and stability of diacyl peroxides make them a preferred choice. The multifaceted nature of benzoyl peroxide, with its applications ranging from polymer synthesis to skincare, underscores its pivotal role in driving the remarkable growth of the diacyl peroxide segment within the organic peroxide market.

“By Application, Coatings, adhesives, and elastomers segment to account for the second highest CAGR during the forecast period.”

Coatings, adhesives, and elastomers are poised to register the second-highest growth in the organic peroxide market, following the chemicals and plastics sector. This surge can be attributed to the expanding demand for these compounds in the formulation and manufacturing of a wide array of materials. Organic peroxides play a pivotal role as initiators and catalysts in the polymerization reactions that are integral to the production of coatings, adhesives, and elastomers. The ever-growing construction and automotive industries, coupled with the rising focus on sustainable and high-performance materials, are driving the need for innovative formulations. Additionally, the versatility of organic peroxides in enhancing the durability, adhesion, and elasticity of coatings, adhesives, and elastomers is fueling their adoption in these applications. As industries continue to prioritize advancements in material science and eco-friendly solutions, the coatings, adhesives, and elastomers segment is expected to witness substantial growth within the organic peroxide market in the foreseeable future.

“APAC to be the fastest growing region in the Organic peroxide market.”

The Asia-Pacific (APAC) region is expected to exhibit the highest compound annual growth rate (CAGR) in the organic peroxide market from 2023 to 2030. This growth is driven by emerging economies in APAC, experiencing substantial demand for organic peroxide. The expansion of the construction industries, propelled by rapid economic development and government initiatives toward infrastructural development, is a key factor. The increasing population in these countries contributes to a robust customer base.

Breakdown of Primaries-

By Company: Tier 1: 40%, Tier 2: 25%, Tier 3: 35%

Organic Peroxide Market by Type (Diacyl, Ketone, Percarbonate, Dialkyl, Hydroperoxides, Peroxyketal, Peroxyest...

By Designation: C-Level: 35%, Director Level: 30%, Others: 35%

By Region: North America: 25%, Europe: 20%, Asia Pacific: 45%, South America: 5%, and Middle East & Africa: 5%.

Companies Covered: Arkema SA (France), NOF Corporation (Japan), Nouryon Chemical Holding B.V. (Netherlands), United Initiators GmbH (Germany), and PERGAN GmbH (Germany), and others are covered in the organic peroxide market.

Research Coverage

The market study covers the organic peroxide market across various segments. It aims at estimating the market size and the growth potential of this market across different segments based on type, application, and region. The study also includes an in-depth competitive analysis of key players in the market, their company profiles, key observations related to their products and business offerings, recent developments undertaken by them, and key growth strategies adopted by them to improve their position in the organic peroxide market.

Key Benefits of Buying the Report

The report is expected to help the market leaders/new entrants in this market share the closest approximations of the revenue numbers of the overall organic peroxide market and its segments and sub-segments. This report is projected to help stakeholders understand the competitive landscape of the market, gain insights to improve the position of their businesses, and plan suitable go-to-market strategies. The report also aims to help stakeholders understand the pulse of the market and provides them with information on the key market drivers, challenges, and opportunities.

The report provides insights on the following pointers:

Analysis of key drivers (Increasing demand from the polymer industry, Increasing use of organic peroxide in paints and coatings), restraints (Safety issues restricting import/export), opportunities (Emerging markets for organic peroxide) and challenges (Logistics and storage issues) influencing the growth of the organic peroxide market.

Product Development/Innovation: Detailed insights on upcoming technologies,

research & development activities, and new product & service launches in the organic peroxide market

Market Development: Comprehensive information about lucrative markets – the report analyses the organic peroxide market across varied regions

Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the organic peroxide market

Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players like Arkema SA (France), NOF Corporation (Japan), Nouryon Chemical Holding B.V. (Netherlands), United Initiators GmbH (Germany), and PERGAN GmbH (Germany), and among others in the organic peroxide market. The report also helps stakeholders understand the pulse of the organic peroxide market and provides them with information on key market drivers, restraints, challenges, and opportunities.
