“Rise in the demand for aesthetically appealing printed tapes and innovative printing styles to drive the packaging tape printing market”

The global packaging tape printing market is projected to grow from USD 21.42 billion in 2015 to USD 28.78 billion by 2020, at a CAGR of 6.08% from 2015 to 2020. The packaging tape printing market is driven by factors such as growing demand of aesthetically appealing tape with innovative printing styles, high demand of digital printing, and rising demand from end-user industry.

“Water-based printing ink to gain maximum demand during the forecast period”

The water-based ink segment is estimated to contribute the largest market share during the forecast period. These inks offer better performance, low printing cost, and less damage to both people and environment. It exhibits high level of compliance with current environmental protection standards. Digital printing is expected to be the fastest growing mechanism in the packaging tape printing market. Printer convertors are adding digital printer in their printing press to realize the benefit of improved productivity, reliability, and cost-effectiveness over higher runs. Polypropylene has emerged as an economically viable alternative for the packaging convertors, and has thereby commanded a major market share in the packaging tape printing industry. Furthermore,

owing to the increased demand of innovative packaging and printing technologies so as to enhance the visibility of packaged products, the packaging tape printing market is projected to witness growth in consumer durables sectors, with food & beverages industry contributing the largest market share during the forecast period.

“Asia-Pacific to gain major market share during the forecast period”

Asia-Pacific is projected to have the largest market share and dominate the global packaging tape printing market from 2015 to 2020. China, one of the leading manufacturer and supplier of printing materials and equipment, exhibits high growth opportunities for the packaging tape printing market. However, the market continues to face challenges due to demand for high-quality printing at low cost while adhering to the government regulations.
