## **Abstracts**

The global patient temperature monitoring market is projected to reach USD 4.9 billion by 2027 from USD 3.6 billion in 2022, at a CAGR of 6.4% during the forecast period . Growth in this market is mostly driven by the rising incidence of infectious diseases coupled with increasing geriatric and pediatric population along with growing demand for advanced temperature monitoring devices.

“Handheld temperature monitoring devices segment accounted for the largest share of the patient temperature monitoring market, by product.”

The patient temperature monitoring market is segmented into wearable continuous monitoring sensors, smart temperature monitoring patches, table-top temperature monitoring devices, handheld temperature monitoring devices, and invasive temperature monitoring devices. In 2021, the handheld temperature monitoring devices segment accounted for the largest share of the patient temperature monitoring market. The large share of this segment can be attributed to the high precision, cost-effectiveness, portability, and ease-of-use offered by the devices.

“Hospitals segment accounted for the largest share in the market, by end users.”

The patient temperature monitoring market has been segmented into hospitals, nursing facilities, home care settings, ambulatory care centers, and other end users. In 2021, hospitals are estimated to be the largest end users of the patient temperature

monitoring market. The large share of this segment can be attributed to the high and growing prevalence of infectious diseases and viruses and growing keenness for non-invasive monitoring.

'Asia Pacific: The fastest-growing region patient temperature monitoring market.'

The global patient temperature monitoring market is segmented into North America, Europe, the Asia Pacific, Latin America, and the Middle East & Africa. The Asia Pacific region is projected to register the highest CAGR during the forecast period. Factors such growing demand for cosmetic surgeries, increasing population, and rising blood donations and transfusion cases are driving the growth of the market in the Asia Pacific.
