Abstracts

The patient monitoring devices market is anticipated to grow at a CAGR of 9.1% to reach USD 65.4 billion by 2027 from USD 42.3 billion in 2022. The growth of the market is mainly attributed to greater adoption of biosensors and connected care devices and higher demand for home-based or home-use products. However, the high cost associated with novel and advanced monitoring devices is expected to limit the market growth.

“In product segment, blood glucose monitoring systems segment will undergo a significant growth by 2027.”

Based on the product, the patient monitoring devices market is segmented into multiparameter monitoring devices, temperature monitoring devices, blood glucose monitoring systems, fetal and neonatal monitoring devices, neuromonitoring devices, weight monitoring devices, cardiac monitoring devices, hemodynamic/pressure monitoring devices, respiratory monitoring devices, and other patient monitoring devices. The substantial growth of the segment is attributed to the technological advancements and ongoing product approval of continuous glucose monitoring systems, benefits offered by continuous monitoring systems over self-monitoring systems in the market. Continuous glucose monitoring systems offer a wide range of advantages over self-monitoring blood glucose systems, such as non-invasive detection shortened detection time, and reduced cost. These advantages among several other advantages offered by the continuous glucose monitoring systems will lead to the

growth of this product segment.

“By end-user hospitals segment is anticipated to account for the major share of the patient monitoring devices market,”

By end-users, the patient monitoring devices market is segmented into home care settings, hospitals, ambulatory surgery centers, and other end users. The demand growth among hospitals is attributed to the momentous availability of state-of-the-art services for patient treatment, diagnosis, as well as trained personnel, and disease management, that has ensured a stable demand for increasing number of hospitals in major countries and the hospital-based care. More diagnostic and screening procedures are carried out in hospitals, promoting to the increased market share. The influx of patients is usually higher in hospitals as compared to other healthcare settings, which is another key driver for segment growth.

“By Region, Asia Pacific Patient Monitoring Devices Market is anticipated to grow at the highest CAGR by 2027.”

The Asia Pacific market will grow at the highest CAGR during the forecast period majorly due to the rising healthcare expenditure, heavy burden of infectious diseases, and increasing geriatric population along with favourable public and private contribution to overall healthcare infrastructure. Apart from this, the increase in the number of ambulatory surgical centers and development of infrastructure in hospitals the APAC region is expected to propel the patient monitoring devices market.

A breakdown of the primary participants referred to for this report is provided below:

By Company Type: Tier 1–45%, Tier 2–34%, and Tier 3– 21%

By Designation: C-level–47%, Director-level–33%, and Others–20%

By Region: North America–35%, Europe–32%, Asia Pacific–25%, Latin America–6%, and the Middle East & Africa–2%

List of Companies Profiled in the Report

Abbott Laboratories (US),

HILL-ROM HOLDINGS, INC. (US),
Dr?gerwerk AG & Co. KGaA (Germany),
Edwards Lifesciences Corporation (US),
OMRON Corporation (Japan),
Masimo Corporation (US),
Compumedics Limited (Australia),
Shenzhen Mindray Bio-Medical Electronics Co., Ltd. (China),
Nihon Kohden Corporation (Japan),
Natus Medical (US), Medtronic plc (Ireland),
Koninklijke Philips N.V. (Netherlands),
GE Healthcare (US), Getinge AB (Sweden),
Boston Scientific Corporation (US),
Dexcom, Inc. (US),
Nonin (US),
BIOTRONIK (Germany),
SCHILLER (Switzerland),
BioTelemetry, Inc. (US)

Research Coverage

This report studies the patient monitoring devices market based on product, end user, and region. It also covers the factors affecting market growth, analyzes the various

Patient Monitoring Devices Market by Product (EEG, MEG, TCD, Pulse Oximeter, Spirometer, Fetal Monitor, Temper...

opportunities and challenges in the market, and provides details of the competitive landscape for market leaders. Furthermore, the report analyzes micromarkets with respect to their individual growth trends and forecasts the revenue of the market segments with respect to five main regions (and the respective countries in these regions).

Reasons to Buy the Report

The report will enable established firms as well as entrants/smaller firms to gauge the pulse of the market, which, in turn, would help them to garner a larger market share. Firms purchasing the report could use one or a combination of the below-mentioned strategies for strengthening their market presence.

This report provides insights on the following pointers:

Market Penetration: Comprehensive information on the product portfolios offered by the top players in the patient monitoring devices market

Product Development/Innovation: Detailed insights on the upcoming trends, R&D activities, and product launches in the patient monitoring devices market

Market Development: Comprehensive information on lucrative emerging regions

Market Diversification: Exhaustive information about new products, growing geographies, and recent developments in the patient monitoring devices market

Competitive Assessment: In-depth assessment of market segments, growth strategies, revenue analysis, and products of the leading market players.

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

FIGURE 17 PATIENT MONITORING DEVICES MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

5.2.1 DRIVERS

5.2.1.1 Increasing technological advancements and innovations

5.2.1.1.1 Increased user-centric designs for wearable devices

5.2.1.1.2 Growing use of non-invasive hemodynamic monitoring

5.2.1.1.3 Rising use of digital data sensors

5.2.1.1.4 Growing use of mobile-grade EEG devices

5.2.1.2 Rising prevalence of chronic diseases

5.2.1.3 Availability of wireless monitoring devices

TABLE 3 RECENT PRODUCT INNOVATIONS IN PATIENT MONITORING DEVICES MARKET

5.2.1.4 Growing preference for wearable patient monitoring devices, biosensors, and smart implants

5.2.1.5 Growing investments, funds, and grants in healthcare systems

5.2.2 RESTRAINTS

5.2.2.1 Risks associated with invasive monitoring devices

5.2.2.2 High cost of patient monitoring products and inadequate reimbursement

5.2.3 OPPORTUNITIES

5.2.3.1 Increasing demand for non-invasive and minimally invasive devices

5.2.3.2 Growing demand for patient monitoring devices in non-hospital settings

5.2.4 CHALLENGES

5.2.4.1 Lack of skilled healthcare professionals

5.2.4.2 Increased pricing pressure on market players

5.3 VALUE CHAIN ANALYSIS
