## **Abstracts**

“The rise in demand for packaged food and beverages is projected to drive the overall growth of the pouches market across the globe from 2019 to 2024.”

The pouches market is projected to grow from USD 36.4 billion in 2019, to reach USD 46.1 billion by 2024, recording a CAGR of 4.8%. The rising demand for packaged food and the need for cost-effective packaging solutions is projected to drive the demand for pouches. However, recycling of multi-layer structure and the availability of substitutes are projected to inhibit the growth of the market.

In terms of value, the stand-up pouches segment is projected to grow at the highest CAGR during the forecast period.

The stand-up pouches segment in the pouches market is projected to grow at the highest CAGR during the forecast period, in terms of value. The growth of this segment is attributed to the high demand for stand-up pouches in the food & beverages industry, as they are durable and render high stability to the product. Stand-up pouches are commonly used for food packaging products such as coffee, tea, sauces, and candies. They are considered an ideal packaging solution for products that weigh less than a pound.

In terms of value, the standard segment is projected to dominate the pouches market from 2019 to 2024.

The standard segment is projected to dominate the pouches market from 2019 to 2024, in terms of value. The demand for longer shelf life, aesthetic appeal, and high seal integrity are some of the key factors contributing to the growth of the standard segment. In addition, this segment is projected to account for the largest share in the market due to its cost-effectiveness and aesthetic display in stores. However, the hot-filled segment is projected to witness significant growth due to high demand for products with longer shelf life and their usage in ready-to-drink beverages.

In terms of both value and volume, the Asia Pacific pouches market is projected to grow at the highest CAGR during the forecast period.

In terms of both value and volume, the Asia Pacific pouches market is projected to grow at the highest CAGR from 2019 to 2024. The growth of the market in this region is attributed to the increase in disposable income of individuals, which has led to a rise in the demand for ready-to-eat products. Furthermore, the easy availability of raw materials and the increasing demand for compact packaging solutions from densely populated countries such as India and China are projected to drive the demand for pouches.

In-depth interviews were conducted with chief executive officers (CEOs), marketing directors, other innovation and technology directors, and executives from various key organizations operating in the stand-up pouches market.

By Company Type: Tier 1: 28%, Tier 2: 29%, and Tier 3: 43%
