## **Abstracts**

This report estimates the power metering market in terms of value in USD million and the number of units the meters shipped. This has been broken down into regions, and further split into countries.

The construction industry along with an increase in the electrification rate in various countries across the globe to provide better living standards would help drive the power metering market. A power meter is an electric device that measures energy consumption and enables uni as well as bi-directional communication, between the meter and the central system. The device reads and stores data of the number of units of electricity consumed at intervals, and communicates this information back to the utility for billing and monitoring purposes. In addition, numerous government regulations to replace aging digital meters with smart meters across Europe by 2020 would act as a catalyst for the growth of the power metering market.

The size of the overall market has been determined by forecast techniques, based on region-wise demand for various types of meters such as smart, digital, and analog. The market is expected to grow at a CAGR of approximately 8.9% from 2015 to 2020.

The report provides a full analysis of key companies and competitive analysis of developments recorded in the industry during the past four years. Market drivers, restraints, and opportunities of the market have been discussed in detail. The leading players of the market such as General Electric (U.S.), Itron (U.S.), Toshiba Corp.

(Japan), Melrose Plc. (U.K.), Wasion Group Holdings Ltd. (China), Holley Metering (China), and Niangbo Sanxing Electric Co. Ltd. (China) have been profiled in this report.
