## **Abstracts**

Protection from increasing instances of security breach due to insider attacks is driving the privileged identity management market

The privileged identity management market size is expected to grow from USD 922.0 million in 2016 to USD 3,792.5 million by 2021, at a Compound Annual Growth Rate (CAGR) of 32.7%. Identity management and access management are among the applications contributing to the growth of the privileged identity management market.

Identity management solution is expected to have the largest market size in the privileged identity management market

The identity management solution is estimated to contribute the largest market share during the forecast period. Due to increasing adoption of Bring Your Own Device (BYOD) technology in enterprises and the efforts of managing the credentials or identities associated with each super-user account, privileged identity is becoming a major point of concern for organizations.

Cloud deployment is expected to grow at the highest rate from 2016 to 2021. Among the verticals, the Banking, Financial Services, and Insurance (BFSI) vertical is expected to contribute the largest market share during the forecast period.
