The global PTFE fabric market is projected to register a CAGR of 5.7% between 2022 and 2027, in terms of value.

The global PTFE fabric market size is projected to grow from USD 0.9 billion in 2022 to USD 1.1 billion by 2027, at a CAGR of 5.7% between 2022 and 2027. Rising demand from emerging markets and growing industrialization are expected to offer significant growth opportunities to manufacturers of PTFE fabric.

“The food segment accounted for the largest share in the PTFE fabric market in terms of value.”

PTFE fabric plays a vital role in the food industry. PTFE fabric is the preferred material for food-grade non-stick coatings. It is widely used in non-stick cookware and other items. The key advantages of PTFE fabric are anti-friction and non-flammability. The material is also hydrophobic and non-toxic, useful in the food industry.

“PTFE coated fabric is the fastest growing PTFE fabric type.”

PTFE coated fabric is the highest quality architectural membrane for tensile structures. In the 1960s, the material was developed by DuPont and has been used for structures since the early 1970s. PTFE coated fabric consists of a fiberglass fabric, aramid, or a polyester fabric which is coated with PTFE to improve its strength and heat resistance.

PTFE coated fabric is widely used for making conveyor belts in the food processing industry. This fabric is also used in the construction industry for roofing applications. Additionally, it is used to make PTFE adhesive tapes.

“North America is estimated to be the second-largest market for PTFE fabric”

North America is the second-largest market for PTFE fabric. The US, Canada, and Mexico are the major countries in the North American region. The region has a strong industrial base in developed economies, such as the US, Canada, and Mexico.
