Abstracts

The global RFID and barcode printer market size was valued at USD 3.9 billion in 2021 and is projected to reach USD 5.3 billion by 2026. It is expected to grow at a CAGR of 6.4% during the forecast period. Increasing installation of RFID and barcode systems in manufacturing units to improve productivity to tackle the impact of COVID-19, growing use of RFID and barcode printers in flourishing global e-commerce industry, surging need for improvement in inventory management, and rising demand for mobile printers based on wireless technologies are the key driving factors for the RFID and barcode printer market. However, stringent printing resolution and poor image quality of the barcode labels hampering the growth of the market.

“Mobile printers to witness a higher CAGR during the forecast period.”

The mobile printers segment of the RFID and barcode printer market is projected to grow at the highest CAGR from 2021 to 2026. The demand for mobile RFID and barcode printers is increasing rapidly worldwide as these printers are used for printing labels, tickets, and receipts in the hospitality, retail, and healthcare sectors. Moreover, mobile printers are used in a number of industries for printing barcodes and RFID labels and tags. They have certain features, making the printing of barcode and RFID labels, tags, and receipts easy. These features include durability, robustness, and ruggedness, along with the simplicity of use, easy connection with mobile devices, and flexible connectivity options, including USB, Bluetooth, and wireless LAN (WLAN).

“Direct thermal printing technology to account for the largest share of the market during the forecast period.”

The barcode printers segment accounted for a larger size of the RFID and barcode printer market for direct thermal technology than the RFID printers segment. Direct thermal printing technology-based RFID and barcode printers are ideal for high-volume printing applications. They are the easiest and most cost-effective solution used in short-term applications. They are employed for printing labels meant for temporary use, such as shipping labels and food packaging labels. The direct thermal segment is projected to lead the RFID and barcode printer market from 2021 to 2026. The growth of this segment of the market can be attributed to the increasing penetration of thermal transfer technology in RFID and barcode printers. They are engineered for high-volume operations in harsh environments.

“Retail application to account for the largest share of the RFID and barcode printer market during the forecast period.”

The RFID printers segment of the RFID and barcode printer market for retail is projected to grow at a higher CAGR than the barcode printers segment from 2021 to 2026. The increasing adoption of RFID printers in garment tagging applications and gaining inventory visibility, as well as for retrieving information about in-store activities, are key contributors to the growth of the RFID and barcode printer market in retail. The demand for RFID and barcode printers is significant in the retail sector. One of the key factors for this high demand is the requirement of maintaining data by tracking inventories through barcodes and RFID tags. Printers are used to print these tags at significantly low costs. They also print rugged and reliable labels, which can withstand all challenging conditions such as abrasion, moisture, and extreme temperatures. Moreover, the inclination of companies toward retailing and the growth potential of the e-commerce business across the world are further expected to fuel the growth of the RFID and barcode printer market.

“North America to account for the largest share during 2021–2026.”

The region has the presence of a large number of providers of RFID and barcode printers, including Zebra Technologies, Honeywell International, and Brother Industries. North America is one of the largest contributors to the RFID and barcode printer market. Additionally, the US leads the market in North America owing to its well-established economy that encourages increased government and private investments in new technologies. RFID and barcode labels and tags help gain information about the

location and the status of assets and people that can be used for increasing staff productivity and optimizing asset utilization in various industries. This leads to the increased adoption of RFID and barcode printers in the manufacturing, transportation, and healthcare industries in North America.

In-depth interviews have been conducted with chief executive officers (CEOs), marketing directors, other innovation and technology directors, and executives from various key organizations operating in the RFID and barcode printer marketplace.

By Company Type: Tier 1 - 25%, Tier 2 – 40%, and Tier 3 - 35%

By Designation: C-Level Executives - 75% and Managers - 25%

By Region: North America - 40%, Europe - 23%, APAC - 26%, and RoW 11%

The RFID and barcode printer market comprises major players such as Zebra Technologies Corp. (US), SATO Holdings Corporation (Japan), Honeywell International (US), Seiko Epson Corp. (Japan), AVERY DENNISON CORPORATION (US), BIXOLON (South Korea), GoDEX International (Taiwan), Toshiba Tec Corporation (Japan), Star Micronics (US), Printronix (US), Primera Technology (US), Postek Electronics (China), Wasp Barcode Technologies (US), and Brother International Corporation (US). The study includes an in-depth competitive analysis of these key players in the RFID and barcode printer market, with their company profiles, recent developments, and key market strategies.

Research Coverage

The report defines, describes, and forecasts the RFID and barcode printer market based on printer type, format type, printing technology, printing resolution, application, and region. It provides detailed information regarding factors such as drivers, restraints, opportunities, and challenges influencing the growth of the RFID and barcode printer market. It also analyzes competitive developments such as product launches, acquisitions, expansions, contracts, partnerships, and developments carried out by the key players to grow in the market.

Key Benefits of Buying the Report

The report will help market leaders/new entrants in this market with information on the

closest approximations of the revenue numbers for the overall RFID and barcode printer market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to better position their businesses and plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

FIGURE 17 DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

5.2.1 DRIVERS

5.2.1.1 Increasing installation of RFID and barcode systems in manufacturing units to improve productivity to tackle impact of COVID-19

5.2.1.2 Growing use of RFID and barcode printers in flourishing global e-commerce industry

FIGURE 18 GLOBAL E-COMMERCE SALES FROM 2017 TO 2023

5.2.1.3 Surging need for improvement in inventory management

TABLE 3 TYPICAL LOSSES IN DATA CENTERS DURING MANUAL ASSET MANAGEMENT FOR APPROXIMATELY 40 THOUSAND SQ. FT. AREA

5.2.1.4 Rising demand for mobile printers based on wireless technologies

5.2.2 RESTRAINTS

5.2.2.1 Stringent printing regulations

5.2.2.2 Poor image quality of barcode labels

5.2.3 OPPORTUNITIES

5.2.3.1 Growing use of RFID and barcode printers in supply chain industry

FIGURE 19 RFID MARKET SIZE, 2017–2026 (USD BILLION)

5.2.3.2 Increasing deployment of RFID and barcode printers in hospitals

5.2.3.3 Rising global adoption of RFID and barcode tags enabled

by Industry 4.0, IoT, and smart manufacturing

5.2.4 CHALLENGES

5.2.4.1 Low contrast of RFID and barcode elements

5.2.4.2 High heat settings of barcode printers can lead to smudged bar lines

TABLE 111 LINERLESS BARCODE PRINTER MARKET IN EUROPE, BY PRINTING
TECHNOLOGY, 2021–2026 (USD MILLION)

12.3.1 UK

12.3.1.1 Surged adoption of RFID and barcode printers in healthcare and manufacturing sectors of UK

12.3.2 GERMANY

12.3.2.1 Risen demand for RFID- and barcode-printed labels from automotive industry of Germany

12.3.3 FRANCE

12.3.3.1 RFID and barcode printer market in France to grow at highest CAGR from 2021 to 2026

12.3.4 ITALY

12.3.4.1 Increased demand for RFID and barcode printers in Italy to contribute to market growth

12.3.5 REST OF EUROPE

12.4 APAC

12.4.1 CHINA

12.4.1.1 China to account for largest share of RFID and barcode printer market in APAC from 2021 to 2026

12.4.2 JAPAN

12.4.2.1 Flourished healthcare, hospitality, retail, automotive, and transportation industries fuel growth of RFID and barcode printer market in Japan

12.4.3 TAIWAN

12.4.3.1 Emergence of Taiwan as key market for RFID and barcode printers in APAC

12.4.4 REST OF APAC

12.5.1 MIDDLE EAST AND AFRICA

12.5.1.1 Retail and manufacturing industries fuel demand for RFID and barcode printers in Middle East and Africa

12.5.2 SOUTH AMERICA

12.5.2.1 Increased industrialization and risen penetration of RFID and barcode printers in retail, entertainment, and government sectors lead to market growth in South America

13 COMPETITIVE LANDSCAPE

15.5 AUTHOR DETAILS

I would like to order

Product name: RFID and Barcode Printer Market with COVID-19 Impact Analysis by Printer Type, Format Type (Industrial Printers, Desktop Printers, Mobile Printers), Printing Technology, Printing Resolution, Application, and Region - Global Forecast to 2026

Product link: <https://marketpublishers.com/r/RCC30FFC492EN.html>

Price: US\$ 4,950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/RCC30FFC492EN.html>
