## **Abstracts**

“Growing construction industry to drive the market for roofing systems”

The global market for roofing systems is projected to grow from USD 109.72 billion in 2016 to reach USD 157.56 billion by 2021, at an estimated CAGR of 3.06% from 2016 to 2021. Growth in the construction industry throughout the world as well as government regulations regarding zero energy building codes and green roofing have played a huge role in providing the necessary momentum to the roofing systems market, after the economic slowdown between 2007 and 2009.

“Asphalt roofing systems to gain maximum traction during the forecast period”

Asphalt is projected to be the fastest-growing materials used for roofing systems in the next five years. Asphalt roofing is durable and aesthetically pleasing. It is also eco-friendly and can be fully recycled and used again for roofing. Asphalt roofing is largely used in residential buildings.

“Asia-Pacific contributes the maximum market share in 2015”

The market for roofing systems is also segmented based on region, which includes North America, Europe, Asia-Pacific, and Rest of the World. North America accounted for the largest share of the total demand generated by the global roofing systems market in 2015 because of the willingness of companies in the region to take up capital-

intensive projects, along with the availability of technical expertise. The Asia-Pacific region is projected to be the fastest-growing market for roofing systems, during the forecast period, owing to the rising economy and the rapid growth in the infrastructure sector.
