Abstracts

The global sanitary pumps and valves market size is expected to grow from USD 2.1 billion in 2023 to USD 2.5 billion by 2028, at a CAGR of 3.6% from 2023 to 2028. Process industries require high hygiene maintenance and cleaning, as humans consume manufactured products. Maintaining hygiene helps prevent these food products, drugs, and beverages from germs. Hence, the manufacturer of the processed products complies with the sanitary standards to avoid the liquid fluid or slurries from contamination and supports good manufacturing practices compliance. All these factors help the demand for sanitary pumps and valves.

'Self-priming segment is projected to grow at the highest CAGR during the forecast period'

Self-priming pumps are designed to handle a variety of fluids and can as well transfer heavier materials such as slurries, corrosive liquids, and suspended solids. Solid handling is one of the most essential advantages of a self-priming pump. Another advantage is its ability to continue pumping fluid without submerging it in a liquid tank or vessel, unlike submersible pumps. These types of pumps also feature close tolerance working parts that trap fluids in the pump's body, preventing them from returning from the discharge side of the pump to the suction side when the pump is not in operation.

'Dairy industry is expected to hold a significant share during the forecast period'

Cleaning the equipment that comes in contact with fluids is essential for dairy processing plants. In cleaning a dairy plant, the main aim is to achieve bacteriological and chemical cleanliness. The manufacturers of dairy products focus on optimizing dairy production and ensuring hygienic conditions. Circulatory clean-in-place (CIP) systems are developed to achieve sanitation and cleaning results, widely adopted in dairy processing plants. Besides, the dairy industry needs to meet the 3A sanitary standards and Pasteurized Milk Ordinance (PMO) requirements. All these factors drive the demand for sanitary pumps and valves in the dairy industry.

'The market in Europe is expected to grow at steady CAGR during the forecast period'

Germany is the largest economy in Europe, and the country is considered the industrial capital of Europe owing to the presence of a large number of manufacturing companies. Some of the major manufacturers of sanitary pumps and valves operating in Germany include GEA Group Aktiengesellschaft (Germany), KSB SE & Co. KGaA (Germany), and Christian B?rkert GmbH & Co. KG (Germany). These players highly focus on the advancement of sanitary pumps and valves to provide the end users with highly efficient hygienic solutions and experiences. Among the processing industries in Germany, chemicals and pharmaceuticals are the rapidly growing industries contributing largely to the country's overall economy and the growth of sanitary pumps and valves in the European region.

Breakdown of the profiles of primary participants:

By Company Type: Tier 1 - 42%, Tier 2 - 35%, and Tier 3 - 23%

By Designation: C-level Executives - 45%, Directors - 32%, and Others - 23%

By Region: North America - 34%, Europe - 30%, Asia Pacific - 27%, and RoW – 9%

Major players profiled in this report are as follows: Alfa Laval (Sweden), Fristam Pumpen KG (GmbH & Co.) (Germany), GEA Group Aktiengesellschaft (Germany), SPX FLOW, Inc. (US), Dover Corporation (US) Evoguard GmbH (Germany), Verder International B.V. (Netherlands), IDEX Corporation (US), Xylem (US), Graco Inc. (US), ITT INC. (US), Inoxpa S.A.U. (Spain), Flowserve Corporation (US), KSB SE & Co. KGaA (Germany), Spirax-Sarco Engineering plc (UK), and others.

Research Coverage

This report has segmented the sanitary pumps and valves market based on valve type, pump priming type, pump power source, material type, hygiene class, pump type, end-user industry, and region. The sanitary pumps and valves market has been segmented based on pump type into centrifugal and positive displacement. Based on valve type, the market has been segmented into single-seat, double-seat, butterfly, diaphragm, control, and others. The market has been segmented into self-priming and non-self-priming based on priming type. The market has been segmented into standard, aseptic, and ultraclean based on hygiene class. The market has been segmented into electric and air-based pump power sources. The market has been segmented into stainless steel, copper, and bronze based on material type. Based on the end-user industry, the market has been segmented into processed food, dairy, alcoholic beverage, nonalcoholic beverage, pharmaceuticals, and other end-user industries. The study also forecasts the market size in four prominent regions—North America, Europe, Asia Pacific, and RoW.

Key Benefits of Buying the Report:

The report provides insights on the following pointers:

Analysis of key drivers (Government mandates for maintaining optimal hygiene levels in process industries, Rising awareness to maintain hygiene in process industries, Plant automation to drive the demand for sanitary pumps and valves), restraints (High price fluctuation in raw materials), opportunities (Growing focus on R&D for sanitary pumps and valves to drive the market growth, Growing adoption of IIoT), and challenges (Growing competition from local and gray market players) influencing the growth of the sanitary pumps and valves market

Product Development/Innovation: Detailed insights on upcoming products, technologies, research & development activities, funding activities, industry partnerships, and new product launches in the sanitary pumps and valves market

Market Development: Comprehensive information about lucrative markets – the report analyses the sanitary pumps and valves market across regions such as North America, Europe, Asia Pacific, Middle East & Africa, and South America.

Market Diversification: Exhaustive information about new products &

technologies, untapped geographies, recent developments, and investments in the sanitary pumps and valves market

Competitive Assessment: In-depth assessment of market ranks, growth strategies, and product offerings of leading players like Alfa Laval (Sweden), Fristam Pumpen KG (GmbH & Co.) (Germany), GEA Group Aktiengesellschaft (Germany), SPX FLOW, Inc. (US), Dover Corporation (US), among others in the sanitary pumps and valves market

Strategies: The report also helps stakeholders understand the pulse of the sanitary pumps and valves market and provides information on key market drivers, restraints, challenges, and opportunities.

TABLE 93 EUROPE: SANITARY PUMPS AND VALVES MARKET, BY END-USER INDUSTRY, 2023–2028 (USD MILLION)

13.3.2 GERMANY

13.3.2.1 Presence of major pharmaceutical manufacturers to favor market growth

13.3.3 UK

13.3.3.1 Growing nonalcoholic beverage industry to provide opportunities for sanitary pumps and valves manufacturers

13.3.4 FRANCE

13.3.4.1 Thriving cosmetics industry to underpin market growth

13.3.5 ITALY

13.3.5.1 Established alcoholic beverage industry to support market growth

13.3.6 BENELUX

13.3.6.1 Presence of major chemical and pharmaceutical companies to fuel demand for sanitary pumps and valves

13.3.7 REST OF EUROPE

13.4 ASIA PACIFIC

13.4.1 ASIA PACIFIC: IMPACT OF RECESSION

13.4.2 CHINA

13.4.2.1 Robust industrial base to support market growth

13.4.3 JAPAN

13.4.3.1 Growing pharmaceutical industry to generate demand for sanitary pumps and valves

13.4.4 INDIA

13.4.4.1 Strong dairy industry to induce demand for sanitary pumps and valves

13.4.5 SOUTH KOREA

13.4.5.1 Increasing use of sanitary pumps and valves in chemical industry to augment market growth

13.4.6 AUSTRALIA

13.4.6.1 Rising demand for processed food and beverages to accelerate adoption of sanitary pumps and valves

13.4.7 REST OF ASIA PACIFIC

13.5 REST OF THE WORLD

13.5.1 REST OF THE WORLD: IMPACT OF RECESSION
