The Asia Pacific seed treatment market is the fastest growing segment of the crop protection market. The seed treatment market consists of chemical seed treatment and non-chemical seed treatments. Seed treatment chemicals dominate the market share in terms of value. Seed treatments are broadly divided on the basis of application as fungicidal seed treatments, insecticidal seed treatments and other (crop enhancement) seed treatments. With a huge market potential and a growing preference, the market is likely to witness considerable growth in the years to come.

This report estimates the market size of the global seed treatment market in terms of revenue for crops such as maize/corn, soybean, rice, wheat, sugar beets, sunflower, etc., as well as targeted protection from pathogens, insects, and other pests. It also delves into the market drivers, restraints and opportunities, market share by major players and countries and its country wise analysis.
