“Growing urbanization driving the smart elevator market”

The smart elevator market is expected to grow from USD 9.54 million in 2015 to USD 26.69 million by 2022. The market is driven by factors such as rapid urbanization, rising adoption of wireless technology, and increasing demand for energy-efficient solutions. The rapid urbanization is considered to be the key driver for the smart elevator market.

“Commercial application to dominate the market during the forecast period”

The commercial application is the largest market. Reducing energy consumption has become a major objective for building owners, governments, and other stakeholders. Replacing existing systems with energy-efficient systems is one of the ways to reduce this pool of energy usage. Adding smart elevator controls over existing systems is the best way to ensure energy reduction.
