Abstracts

The smart thermostat market size is expected to grow from USD 2.5 billion in 2021 to USD 6.4 billion by 2026; it is expected to grow at a CAGR of 20.8% from 2021 to 2026. The key factors driving the growth of the smart thermostat market are increasing adoption of smart homes attributed to COVID-19 situation, emergence of IoT-enabled HVAC systems, government regulations pertaining to increase energy efficiency of buildings, and surging adoption of smart home voice assistants.

“Market for connected smart thermostats to account for largest market share during forecast period”

The connected smart thermostat segment is expected to continue to hold the largest market size during the forecast period. The growth of the connected smart thermostat segment is majorly driven by the increasing demand for energy-efficient devices and the expansion of the smart home market. The growing smart home market in APAC is expected to create lucrative opportunities for the global market players in the near future. As the product is cheaper as compared to a learning thermostat, it is a preferred choice for commercial building applications.

“Wireless network to account for larger market share during forecast period”

The wireless segment is expected to continue to hold the larger market size during the forecast period. Wireless network is the most widely used connectivity technology in smart thermostats as it helps to reduce the installation and maintenance costs, provides higher flexibility and scalability, and better connectivity. The installation of wireless connectivity makes smart thermostats more compatible with smart devices such as smartphones, tablets, and laptops for operation. The increasing adoption of smart homes in the US is fueling the demand for smart thermostats based on wireless connectivity technology.

“New installation to account for larger market share during forecast period”

The new installation segment is expected to continue to hold the larger market size during the forecast period. Rapid infrastructure developments, improved standard of living, and increased focus on developing energy-efficient HVAC systems are fueling the growth of the smart thermostat market for new installation. Implementation of various government regulations to deploy energy-efficient HVAC systems and controls has resulted in the wide adoption of smart thermostats in new buildings. These factors have led to the higher growth of the new installation segment.

“Residential vertical to hold largest size during forecast period”

The residential vertical is expected to hold the largest market size during the forecast period. The growing awareness regarding energy conservation & efficiency and environmental protection has fueled the adoption of energy-efficient HVAC controls such as smart thermostats. They help in the optimum utilization of energy and maintaining the most comfortable and healthy environment indoors. Favorable government regulations and tax credit facilities on the installation of HVAC systems and the increasing focus of end users on reducing electricity bills have significantly contributed to the growth of the smart thermostat market for the residential vertical.

“North America is expected to capture largest market size during forecast period”

The North American region is expected to hold the largest share of the smart thermostat market during the forecast period. Supportive government plans and programs & favorable laws are the major factors driving the growth of the regional market. However, the US witnessed a significant decline in the market size in 2020 due to the sudden outbreak of the COVID-19 pandemic and its adverse effects on the infrastructure, industrial, and commercial sectors. The adoption of smart thermostats might be largely impacted in 2021 due to the shutdown of various ongoing construction sites. However,

with these projects gradually resuming operations, the demand for smart thermostats is expected to increase with time in the coming years, along with economic recovery.

The break-up of the profiles of primary participants for the report has been given below:

By Company Type: Tier 1 = 40%, Tier 2 = 35%, and Tier 3 = 25%

By Designation: C-Level Executives = 48%, Directors = 33%, and Others = 19%

By Region: North America = 35%, Europe = 18%, APAC = 40%, and RoW = 7%

Major players operating in the smart thermostat market include Alphabet (Google Nest) (US), Emerson Electric (US), Honeywell International (US), Lennox International (US), ecobee (Canada), Carrier Corporation (US), Johnson Controls (Lux Products) (Ireland), Legrand (Netatmo) (France), Resideo Technologies (US), Siemens (Germany), Trane Technologies (Ireland), Control4 Corporation (US), Nortek Control (US), tado (Germany).

Research Coverage:

The research report on the global smart thermostat market covers the market based on products, connectivity technology, installation type, vertical, and region. Based on products, the market has been segmented into connected smart thermostat, learning smart thermostat, standalone smart thermostat. Based on connectivity technology, the smart thermostat market has been segmented into wireless network, and wired network. Based on installation type, the smart thermostat market has been segmented into new installation and retrofit installation. Based on vertical, the market has been segmented into residential, commercial, and industrial. The report covers four major regions, namely, North America, Europe, Asia Pacific (APAC), and Rest of the World (RoW).

Key Benefits of Buying the Report:

This report segments the smart thermostat market comprehensively and provides the closest approximations of the overall market size, as well as that of the subsegments across different products, connectivity technologies, installation types, verticals, and regions.

The report helps stakeholders understand the pulse of the market, expected

market scenario and provides information on key market drivers, restraints, challenges, and opportunities.

The report helps to understand the COVID-19 impact on the smart thermostat market

I would like to order

Product name: Smart Thermostat Market by Product (Connected, Learning, Standalone), Connectivity Technology (Wireless, Wired), Installation Type (New Installation, Retrofit Installation), Vertical (Residential, Commercial, Industrial), and Region - Global Forecast to 2026

Product link: <https://marketpublishers.com/r/SEDA7E49571EN.html>

Price: US\$ 4,950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/SEDA7E49571EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
