## Abstracts

The global soil amendments market is estimated at USD 3.6 Billion in 2022. It is projected to reach USD 6.0 Billion by 2027, recording a CAGR of 11.0 % during the forecast period. Soil amendments are ingredients that are added to the soil to enhance its physical properties. This include permeability, water retention, water infiltration, aeration, drainage, and soil structure. To improve soil health, soil amendments are mixed properly into the soil. The types of soil amendments available in the industry can be classified as organic and inorganic, serving different soils such as sand, loam, clay, and slit.

“North America is projected to witness the growth of 9.8% during the forecast period.”

Rise in industrial events is a one of the important factors that has caused soil degradation in the North America. Additionally, North America is a home of several mine which is also responsible for barren soil land and causes erosion by wind and rain. In 2017, soil disappears ten times faster in the US than it is naturally replenished at an estimated rate of nearly 1.7 billion tons of farmland per year, as per the Cornell Study. Plus, it affects the economy leads to loss around USD 37 billion annually in the agricultural production because of soil loss.

The report by Soil Science Society of America suggest, organizations such as the Land

Institute and American Farmland Trust are supporting farmers to seek economical soil conservation substitutes and encouraging them to use natural soil amendments to revive the soil.

“The organic soil amendments dominate the market with 89.7% of total market share in value.”

The shift toward sustainable agriculture and the rise in consumption of organic foods are factors that have led to a rise in demand for organic soil amendments, which include polysaccharides, humic acid, seaweed extracts, and biofertilizers. Key players, such as BASF SE (Germany), Syngenta (Switzerland), and Bayer (Germany), are majorly involved in producing new biofertilizer products, which are bio-based and do not cause any harm to the environment, unlike their chemical counterparts.

“High efficacy rate to drive the demand for liquid soil amendments.”

Liquid formulations of soil amendments include suspensions or solutions that contain microorganisms to make the aerobic fermentation process promote the growth of microbes. The liquid form provides various options for crop growers to mix soil amendments with insecticides, fungicides, or adjuvants. However, liquid formulations differ significantly in the nature of their characteristics that influence the selection, application rate, method of application, and environmental impact. The liquid form is convenient to use and is effective for the application of soil amendments. Therefore, the demand for liquid soil amendments is expected to upsurge in the coming years.

Break-up of Primaries:

By Company Type: Tier 1 – 45.0%, Tier 2- 30.0%, Tier 3 – 25.0%

By Designation: Managers – 50.0%, CXOs – 20.0%, and Executives- 30.0%

By Region: US - 15%, India – 50%, Italy – 15%, South America – 20%

Leading players profiled in this report:

BASF SE (Germany)

UPL Limited (India)

FMC Corporation (US)

Adma (Israel)

Nufarm (Australia)

Evonik Industries (Germany)

Novozymes A/S (Denmark)

Bayer (Germany)

T Stanes & Company (India)

Lallemand Inc (Canada)

#### Research Coverage:

The report segments the coconut oil market on the basis of product type, source, nature, application and region. In terms of insights, this report has focused on various levels of analyses—the competitive landscape, end-use analysis, and company profiles, which together comprise and discuss views on the emerging & high-growth segments of the global coconut oil, high-growth regions, countries, government initiatives, drivers, restraints, opportunities, and challenges.

#### Reasons to buy this report:

To get a comprehensive overview of the coconut oil market

To gain wide-ranging information about the top players in this industry, their product portfolios, and key strategies adopted by them

To gain insights about the major countries/regions in which the coconut oil market is flourishing

## **4 PREMIUM INSIGHTS**

### 4.1 OVERVIEW OF THE SOIL AMENDMENTS MARKET

FIGURE 11 GROWING RISK OF SOIL DEGRADATION AND DESERTIFICATION OF LAND TO DRIVE THE GROWTH OF THE SOIL AMENDMENTS MARKET

### 4.2 SOIL AMENDMENTS MARKET, BY TYPE

FIGURE 12 ORGANIC SEGMENT OCCUPIED THE LARGEST SHARE IN THE SOIL AMENDMENT MARKET IN 2021

### 4.3 NORTH AMERICA: SOIL AMENDMENTS MARKET, BY CROP TYPE AND KEY COUNTRIES

FIGURE 13 UNITED STATES WAS THE MAJOR CONSUMER OF SOIL AMENDMENTS IN THE NORTH AMERICAN REGION, 2021

### 4.4 SOIL AMENDMENTS MARKET, BY SOIL TYPE AND REGION

FIGURE 14 NORTH AMERICA HELD THE LARGEST MARKET SHARE FOR SILT IN 2021

### 4.5 SOIL AMENDMENTS MARKET, BY KEY COUNTRY

FIGURE 15 GERMANY TO GROW AT THE HIGHEST CAGR FROM 2022 TO 2027

## **5 MARKET OVERVIEW**

### 5.1 INTRODUCTION

### 5.2 MACROECONOMIC INDICATORS

#### 5.2.1 RISE IN ORGANIC FARM AREA

FIGURE 16 ORGANIC FARM AREA GROWTH TREND, BY KEY COUNTRY,

### **2017–2019 (THOUSAND HA)**

#### 5.2.2 DECLINE IN ARABLE LAND

FIGURE 17 ARABLE LAND AREA PER CAPITA, 1960–2050 (HA)

### 5.3 MARKET DYNAMICS

FIGURE 18 SOIL AMENDMENTS MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

#### 5.3.1 DRIVERS

5.3.1.1 Easier availability of humic substances as raw materials

5.3.1.2 Strong market demand for organic food products and high-value crops

FIGURE 19 AREA HARVESTED UNDER FRUITS & VEGETABLES, 2013–2017

(MILLION HA)

5.3.1.3 Initiatives by government agencies to promote the use of organic amendments

5.3.1.4 Growing awareness about soil health management

5.3.2 RESTRAINTS

5.3.2.1 Supply of adulterated and low-quality products

5.3.2.2 Short shelf life of soil amendments

5.3.3 OPPORTUNITIES

5.3.3.1 Incorporation of soil amendments into fertilizer formulations

5.3.3.2 Strong growth in developing countries

5.3.4 CHALLENGES

5.3.4.1 Lack of awareness among farmers

5.4 PATENT ANALYSIS
