Abstracts

The global market for specialty gas has grown significantly during the past few years and is expected to grow at a more rapid pace in the next five years, mainly driven by growing demand in the Asia-Pacific region. China is experiencing the highest specialty gas demand globally, mainly due to increase in its industrial growth. This global market in other countries is emerging as well and is expected to grow significantly in the future.

This market research study estimates and projects the global market of specialty gas for the period 2011 to 2018. This study provides detailed qualitative and quantitative analysis of the global market. The report provides a comprehensive review of major market drivers, restraints, opportunities, challenges, and key issues in the market. The market analysis is further segmented for major geographic regions that are, North America, Europe, Asia-Pacific and Rest of the World. The market analysis is further sub-segmented for major countries like U.S., China, Germany, France, Japan, Brazil and their market revenues are covered for each of the country. The top players of the industry are profiled in detail with their recent developments and other strategic industry activities.

The market has also been segmented on the basis of types and applications. The major types of specialty gas are high purity, noble, carbon, halogen, and others. Its major applications are manufacturing, electronics, healthcare, academics, amongst others. These types and applications have been discussed in detail in the report.

We have used various secondary sources such as encyclopedia, directories, and databases to identify and collect information useful for this extensive commercial study of specialty gas. The primary sources – selected experts from related industries and selected suppliers have been interviewed to obtain and verify critical information and to assess its future prospects.

We have also profiled leading players of this industry with their recent developments and other strategic industry activities. Key participants in this global market include Praxair Incorporated (U.S.), Air Products and Chemicals (U.S.), Messer Group GmbH (Germany) and so on.

Scope of the report:

This research report categorizes the global market for specialty gas on the basis of types, applications and geography; forecasting revenues and analyzing trends in each of the submarkets.

On the basis of types: This global market is segmented on the basis of types such as high purity, noble, carbon, halogen, and others. Each type is further described in detail in the report with revenues projected for each type.

On the basis of applications: The specialty gas market is segmented on the basis of industry applications such as manufacturing, electronics, healthcare, academics, amongst others. Each application is further described in detail in the report with revenues estimated for each application.

On the basis of geography: North America, Europe, Asia-Pacific, and ROW and key countries in every region
