“Spine Surgery Devices Market Forecasts to 2017 - (Fusion, Non-fusion, Artificial discs, Nucleus replacement, Spinal decompression, Vertebral Compression Fractures treatment, Kyphoplasty, Spine stimulators, and Spine biologics) - Global Trends & Competitive Analysis”

Spine surgery devices market is considered as a very important and lucrative sub segment of orthopedic industry. The global spine surgery devices market is estimated at \$11,554 million in 2012 and is poised to grow at a CAGR of 5.1% to reach \$14,833 million by 2017.

The spine surgery devices market is broadly segmented into five classes, such as fusion, non-fusion, spinal decompression, vertebral compression fracture treatment products and spine biologics. Fusion category can be divided into spine fusion and fixation and spinal bone stimulators. Non-fusion segment consists of motion preservation technologies such as dynamic stabilization, artificial discs, annual repair, and nucleus replacement. Spinal decompression segment consists of niche markets such as corpectomy, disectomy, foraminotomy/forminectomy and laminotomy/laminectomy. Vertebral compression fractures treatment category includes market for vertebroplasty and kyphoplasty kits. Allografts, bone morphogenetic proteins, demineralised bone matrix, bone substitutes and machined bones, together contribute to overall category of spine biologics.

Increasing aging population, technological advancements, rising industry players and increasing demand for MIS procedures are the major drivers which are slated to propel this market. However, the pricing pressures, economic slowdown and unstable reimbursement policies will restrict the growth of this market to a certain extent.

In 2012, North America is estimated to contribute to the largest market share of the global spine surgery devices, followed by Europe. However, the Asian countries represent the fastest growing markets due to large population, growing physicians and patient awareness about the new technologies, improving reimbursement coverage, booming medical tourism and increased purchasing power of hospitals. Moreover, economic slowdown, pricing pressures and cumbersome regulatory procedures in mature countries will compel the companies to focus on the Asian markets.

Scope of the Report

This research report categorizes the market for spine surgery devices into the following segments:

Global spine surgery market, by technology

Fusion

Fusion and fixation

Spine bone stimulators

Non-fusion

Dynamic stabilization

Artificial discs

Annulus repair

Nucleus replacement

Vertebral compression fracture treatment products

Spinal decompression

Corpectomy

Disectomy

Foraminotomy/foraminectomy

Laminotomy/laminectomy

Spine biologics

Global spine surgery market, by products

Fusion – Devices used in fusion procedures in the spinal regions such as cervical, thoracic and lumbar. Moreover, this category also includes devices from spine bone stimulators market

Cervical fusion – Anterior cervical fusion devices (plates and screws), posterior cervical fusion devices (plates, rods and pedicle screws) and interbody fusion devices (bone and non-bone)

Thoracic fusion and lumbar fusion – Anterior and posterior thoracic and lumbar fusion devices, interbody lumbar fusion devices (by approach - ALIF, PLIF, TLIF and LLIF, by fusion material – bone and non-bone)

Spine bone stimulators – It included electrical invasive and non-invasive devices. Non-invasive devices are further segmented into pulsed electromagnetic field therapy devices and Capacitive Coupling (CC) systems.

Non-fusion category – It includes motion preservation techniques such as:

Dynamic stabilization devices, namely, interspinous process spacers, pedicle screw based systems and facet replacement products

Artificial discs – It includes two types of discs, namely, cervical discs and lumbar discs

Annulus repair products

Disc nucleus replacement products

Vertebral compression fracture treatment products – Comprises vertebroplasty and kyphoplasty devices

Spine biologics – It includes bone grafts and bone graft substitute products such as:

Allograft bones

Demineralized Bone Matrices

Bone Morphogenetic Proteins

Bone substitutes

Machined bones

The key players in this market are Medtronic (U.S.), DePuy Spine (U.S.), Synthes (U.S.), Stryker Corporation (U.S.), NuVasive (U.S.), Globus Medical (U.S.), Orthofix International (The Netherlands), Biomet Spine (U.S.), Zimmer (U.S.), Alphatec Spine (U.S.), Pioneer Surgical (U.S.), K2M (U.S.), Integra Lifesciences (U.S.), LDR Holdings (U.S.), Amedica (U.S.), Orthovita (U.S.), Exactech (U.S.), and Trans1 (U.S.).

2 EXECUTIVE SUMMARY

3 MARKET OVERVIEW

- 3.1 SPINE ANATOMY
- 3.2 SPINE SURGERY TECHNOLOGIES MARKET
- 3.3 SPINE SURGERY PRODUCTS MARKET
- 3.4 MARKET DYNAMICS
 - 3.4.1 DRIVERS
 - 3.4.1.1 Technological advancements
 - 3.4.1.2 Increasing aging and obese population to drive the market growth
 - 3.4.1.3 Increasing demand for minimally invasive surgical procedures
 - 3.4.1.4 Continuously growing number of market players
 - 3.4.2 RESTRAINTS
 - 3.4.2.1 High cost, time and data required by regulatory agencies in product approval process is hampering the growth of small innovative companies
 - 3.4.2.2 Uncertainty in reimbursement is hindering the market growth
 - 3.4.3 OPPORTUNITIES & CHALLENGES
 - 3.4.3.1 Emerging markets
 - 3.4.3.2 Commercial applications in high growth areas such as MIS, nucleus arthroplasty, artificial disc replacement and stem cell technology
 - 3.4.3.3 Lack of physician and patient awareness/education pose daunting challenges for market players
 - 3.4.3.4 Sustainability in highly competitive market
