## **Abstracts**

“Butylated triphenyl phosphate market is projected to reach USD 30.7 million by 2026”

The global butylated triphenyl phosphate market is projected to reach USD 30.7 million by 2026, at a CAGR of 4.8% from 2016 to 2026. The increasing number of vehicles around the world has led to an increase in the demand for lubricants, which in turn is driving the global butylated triphenyl phosphate market. Whereas, volatile crude oil prices are expected to restrain market growth.

“Flame retardant segment to register high growth in the butylated triphenyl phosphate market”

The flame retardants application segment of global butylated triphenyl phosphate market is expected to grow at the highest CAGR during the forecast period. Butylated triphenyl phosphate offers several properties, such as, superior thermal resistance, and high corrosion resistance. Butylated triphenyl phosphate is widely used as a flame retardant in the plastic manufacturing industry.

“Latin America market projected to grow at the highest CAGR during the forecast period”

The Latin American butylated triphenyl phosphate market is expected to grow at the highest CAGR from 2016 to 2026. Growth in this market is driven by the increasing

demand for butylated triphenyl phosphate from Brazil. With the increasing demand from its construction and automotive industries, Brazil is a major consumer of butylated triphenyl phosphate in the Latin American region. The Asia-Pacific region accounted for the largest market share in the butylated triphenyl phosphate market in 2015, and this large share is mainly attributed to the large industrial base in the region.
