## **Abstracts**

The global threat modeling tools market is expected to grow from an estimated USD 0.8 billion in 2022 to USD 1.6 billion by 2027 at a Compound Annual Growth Rate (CAGR) of 14.9% from 2022 to 2027.

The increasing adoption of threat modeling tools is possible due to the adherence to strict regulatory compliances and the widespread availability of customizable threat modeling tools. However, limited budget, integration complexities with existing systems, and high cost associated with the installation of the threat modeling tools are expected to hinder the market growth.

By component, the solutions segment is expected to account for a larger market size during the forecast period

Threat modeling tools are software solutions that automate the process of identifying and assessing potential threats to a system or organization. They include features such as templates for creating threat models, methods for identifying and categorizing threats, methods for evaluating the likelihood and impact of threats, and reporting and visualization capabilities. These tools can be used by security professionals, developers, and other stakeholders to identify and prioritize potential security issues and make more informed decisions about how to mitigate or respond to them. Examples of threat modeling tools include Microsoft Threat Modeling Tool, IriusRisk, and Trivy.

By vertical, healthcare to grow at a higher CAGR during the forecast period

In the healthcare industry, sensitive information needs to be protected. These include patient medical records, personal identification information, and financial information. This makes healthcare organizations a prime target for cyber-attacks. Threat modeling tools help healthcare organizations identify potential threats to their systems and networks and determine the risk posed by those threats. An example of a threat modeling tool that is commonly used in the healthcare sector is Anomali ThreatStream. This tool allows healthcare organizations to detect and respond to cyber threats in real-time by aggregating and analyzing threat data from multiple sources, such as open-source intelligence, commercial threat intelligence, and internal systems. This tool can also integrate with other security tools and systems, such as SIEM and vulnerability management software, to provide a more comprehensive view of an organization's security posture. For example, Anomali ThreatStream allows organizations to prioritize their security efforts by identifying the most critical assets and the most likely attack scenarios. Based on this information, the tool can provide recommendations for mitigating potential threats, such as implementing specific security controls or strengthening existing ones. Additionally, the tool can be used to perform incident response and forensic investigations and to identify and track the activities of APT groups, criminal organizations, and state-sponsored actors.

By organization size, large enterprises account for a significant market size during the forecast period

Large organizations are adopting threat modeling tools to bolster their cybersecurity defenses and ensure compliance with industry regulations. These tools enable organizations to proactively identify and analyze potential security risks and vulnerabilities in their systems, applications, and networks, and implement appropriate measures to mitigate or prevent them. By providing real-time threat intelligence, streamlining security workflows, and integrating with other security tools, these solutions enhance the organization's overall security posture and readiness to combat cyber threats. An example of a threat modeling tool that is commonly used in large enterprises is the Preempt Threat Modeling Tool. This tool is designed to help organizations identify and prioritize potential security threats and vulnerabilities in their systems, applications, and networks. It is an automated threat modeling tool that can be used to identify and evaluate potential attack scenarios and to prioritize mitigation efforts. It also guides how to mitigate or prevent identified security risks and vulnerabilities, making it accessible for organizations with limited resources. Additionally, it integrates with other security tools, such as SIEM and vulnerability management software, to provide a more

comprehensive view of an organization's security posture.

### Breakdown of Primaries

In-depth interviews were conducted with Chief Executive Officers (CEOs), marketing directors, other innovation and technology directors, and executives from various key organizations operating in the threat modeling tools market.

By company type: Tier 1: 40%, Tier 2: 35%, and Tier 3: 25%

By designation: C-level: 45% and Managerial: 30% and other levels: 25%

By region: North America: 35%, Asia Pacific: 30%, and Europe: 35%

Major vendors in the global threat modeling tools market Cisco (US), IBM (US), Synopsys (US), Intel (US), Microsoft (US), Varonis Systems (US), Sparx Systems (Australia), Kroll (US), Mandiant (US), Coalfire (US), Securonix (US), Security Compass (Canada), IriusRisk (Spain), Kenna Security (US), ThreatModeler (US), Toreon (Belgium), Foreseeti (Sweden), Tutamantic (UK), Cymune (India), Avocado Systems (US), Secura (Netherlands), qSEAp (India), VerSprite (Georgia) and IMQ Minded Security (Italy).

The study includes an in-depth competitive analysis of the key players in the threat modeling tools market, with their company profiles, recent developments, and key market strategies.

### Research Coverage

The report segments the threat modeling tools market and forecasts its size by component, platform, organization size, vertical, and region.

### Key Benefits of Buying the Report

The report will help market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall threat modeling tools market and its subsegments. It will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and plan suitable go-to-market strategies. It also helps stakeholders understand the market's pulse and

provides information on key market drivers, restraints, challenges, and opportunities.

## Contents

### 1 INTRODUCTION

#### 1.1 STUDY OBJECTIVES

#### 1.2 MARKET DEFINITION

##### 1.2.1 INCLUSIONS & EXCLUSIONS

#### 1.3 STUDY SCOPE

##### 1.3.1 MARKET SEGMENTATION

##### 1.3.2 REGIONS COVERED

#### 1.4 YEARS CONSIDERED

#### 1.5 CURRENCY CONSIDERED

#### TABLE 1 USD EXCHANGE RATES, 2018–2023

#### 1.6 STAKEHOLDERS

### 2 RESEARCH METHODOLOGY

#### 2.1 RESEARCH DATA

#### FIGURE 1 THREAT MODELING TOOLS MARKET: RESEARCH DESIGN

##### 2.1.1 SECONDARY DATA

##### 2.1.2 PRIMARY DATA

###### 2.1.2.1 Breakup of primary interviews

###### 2.1.2.2 Key industry insights

#### 2.2 DATA TRIANGULATION

#### FIGURE 2 THREAT MODELING TOOLS MARKET: RESEARCH FLOW

#### 2.3 MARKET SIZE ESTIMATION

#### FIGURE 3 MARKET SIZE ESTIMATION METHODOLOGY – APPROACH 1 (SUPPLY SIDE): REVENUE FROM SOLUTIONS/SERVICES OF THREAT MODELING TOOL VENDORS

#### FIGURE 4 MARKET SIZE ESTIMATION METHODOLOGY – APPROACH 2, TOP-DOWN APPROACH: DEMAND-SIDE ANALYSIS

#### 2.4 MARKET FORECAST

#### TABLE 2 FACTOR ANALYSIS

#### 2.5 RECESSION IMPACT

#### TABLE 3 RECESSION IMPACT

#### 2.6 RESEARCH ASSUMPTIONS

### **5 MARKET OVERVIEW AND INDUSTRY TRENDS**

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

FIGURE 14 THREAT MODELING TOOLS MARKET: DRIVERS, RESTRAINTS,  
OPPORTUNITIES, AND CHALLENGES

5.2.1 DRIVERS

5.2.1.1 Growing demand for user-friendly threat modeling tools

5.2.1.2 Rising need for effective reporting and visualization

5.2.1.3 Increasing adoption of customized modeling tools

## 5.2.2 RESTRAINTS

5.2.2.1 Integration issues and compatibility limitations in cloud environment

5.2.2.2 Rising complexities

5.2.2.3 High costs

## 5.2.3 OPPORTUNITIES

5.2.3.1 Rising cyber threats

5.2.3.2 Widespread adoption of cloud and IoT

5.2.3.3 Government initiatives to create range of opportunities for vendors

## 5.2.4 CHALLENGES

5.2.4.1 Data privacy concerns

5.2.4.2 Lack of in-house expertise

## 5.3 ECOSYSTEM ANALYSIS

### FIGURE 15 ECOSYSTEM ANALYSIS

## 5.4 TECHNOLOGY ANALYSIS

5.4.1 AI/ML

5.4.2 BIG DATA ANALYTICS

5.4.3 IOT

5.4.4 CLOUD COMPUTING
