## **Abstracts**

“The urgent care center market is projected to grow at a CAGR of 5.3%. during the forecast period”

The global urgent care center market is projected to reach USD 25.93 billion by 2023 from an estimated value of USD 20.07 billion in 2018, at a CAGR of 5.3%. The key factors driving the growth of this market are affordable care and shorter waiting periods offered by urgent care centers, growing investments in urgent care, increasing geriatric population, and strategic developments between urgent care providers and hospitals. On the other hand, the lack of a skilled workforce could be a challenging factor for this market.

“The trauma/injury treatment segment is projected to grow at the highest CAGR during the forecast period.”

Based on services, the urgent care center market is segmented into acute illness treatment, trauma/injury treatment, physical examinations, immunization & vaccination, and other services. The trauma/injury treatment segment is expected to grow at the highest CAGR during the forecast period. The high growth in this segment can be attributed to the rising number of unintentional, minor injuries and the increasing preference for affordable and immediately available healthcare services.

“North America to witness the highest growth during the forecast period.”

North America is expected to grow at the highest CAGR during the forecast period of 2018–2023. Factors such as the growing geriatric population in the region, the affordability and promptness of urgent care services, and the inception of specialty urgent care, are expected to drive market growth during the forecast period.

Break of primary participants was as mentioned below:

By Designation – C-level–31%, Director Level–19%, Others–50%
