Abstracts

“The growth in VAV BOX demand is increasing due to the growing construction industry, especially commercial and industrial construction in developing countries due to rapid economic development.”

The VAV BOX market size is estimated to be USD 4.7 billion in 2019 and is projected to reach USD 6.4 billion by 2024, at a CAGR of 6.3%. The growth of the global construction industry is expected to boost the HVAC market, which in turn will drive the demand for VAV systems and VAV boxes. According to the Oxford Economics, the construction output will grow by 85% to reach USD 15.5 trillion by 2030 globally, with three countries – China, US, and India accounting for 57% of the global growth of the construction sector. Thus, the expected increase in the market size of HVAC will drive the VAV system’s and VAV box’s market. Furthermore, the increasing need for energy conservation in buildings from the commercial and industrial sector will escalate the demand for energy-efficient and cost-effective heating and cooling solutions, which is another driving factor for the market. However, the presence of substitute technologies and increased preference of refurbished VAV boxes are expected to restrain the growth of the VAV box market globally.

“Single-Duct VAV is the fastest growing segment of VAV BOX.”

Single-duct VAV was the largest as well as the fastest-growing segment of the VAV box market globally in 2018. The huge consumption of single-duct VAV systems in commercial buildings due to its various advantages such as low sound level operation, cost-effectiveness, and efficiency in maintaining the optimum temperature in different climatic condition are the major factors driving the demand for single-duct VAV.

“Commercial building is the largest application of VAV BOX.”

Commercial building is the largest application of VAV box. The increasing spending on public and private infrastructure development will contribute to the growth of the VAV box market. The continuous increase in new construction, including manufacturing and office construction, are the major factors leading to the demand of commercial buildings.

“APAC is the fastest-growing market for VAV BOX.”

APAC is projected to register the highest growth rate during the forecast period owing to the presence of developing markets such as China and Japan as well as emerging economies such as India, South Korea, and Indonesia. APAC is one of the prominent construction markets and is expected to grow at a rapid pace in the coming years, with India expected to become a new global hub for construction in the emerging markets, growing almost twice as fast as China. Therefore, due to the strong growth of the construction industry, the region is expected to have a heavy demand for VAV box during the forecast period.

Extensive primary interviews were conducted in the process of determining and verifying sizes of different types, end-user of the VAV BOX market gathered through secondary research.

The breakdown of primary interviews is given below:

By Company Type: Tier 1 – 45%, Tier 2 – 22%, and Tier 3 – 33%

By Designation: C-Level Executives – 50%, Director-Level – 25%, and Others – 25%

By Region: North America – 50%, Europe – 20%, APAC – 20%, and South America – 10%,

The key companies profiled in this report on the VAV BOX market include Ingersoll Rand PLC (Ireland), Johnson Controls (US), TROX GmbH (Germany), Spectrum Industries (India), United Technologies Corporation (US), Honeywell International Inc. (US), Daikin Industries, Ltd. (Japan), Siemens AG (Germany), Systemair AB (Sweden), Barcol-Air (Switzerland).

Research Coverage

The VAV box market has been segmented based on type, application, and region. This report covers the VAV BOX market and forecasts its market size until 2024. It also provides detailed information on company profiles and competitive strategies adopted by the key players to strengthen their position in the VAV BOX market. The report also provides insights into the drivers and restraints in the VAV BOX market along with opportunities and challenges. The report also includes profiles of top manufacturers in the VAV BOX market.

Reasons to Buy the Report

The report is expected to help market leaders/new entrants in the following ways:

1. This report segments the VAV BOX market and provides the closest approximations of revenue numbers for the overall market and its segments across different verticals and regions.
2. This report is expected to help stakeholders understand the pulse of the VAV BOX market and provide information on key market drivers, restraints, challenges, and opportunities influencing the market growth.
3. This report is expected to help stakeholders obtain an in-depth understanding of the competitive landscape of the VAV BOX market and gain insights to improve the position of their businesses. The competitive landscape section includes detailed information on strategies, such as new product developments, expansions, joint ventures, and mergers & acquisitions.

7.3 INDUSTRIAL BUILDING

7.3.1 INCREASING INDUSTRIAL CONSTRUCTION IN APAC TO DRIVE THE DEMAND FOR VAV BOX

7.4 RESIDENTIAL BUILDING

7.4.1 HIGH NUMBER OF RESIDENTIAL PROPERTIES IN MEA DRIVES THE USE OF VAV BOX IN RESIDENTIAL BUILDINGS

8 VAV BOX MARKET, BY REGION

8.1 INTRODUCTION

8.2 NORTH AMERICA

8.2.1 US

8.2.1.1 Strong demand for residential and non-residential construction to drive the VAV box market

8.2.2 CANADA

8.2.2.1 Increasing demand for green buildings to drive the country's VAV box market

8.2.3 MEXICO

8.2.3.1 Increasing infrastructure development to drive the VAV box market

8.3 MIDDLE EAST & AFRICA

8.3.1 UAE

8.3.1.1 Investment in new construction projects to drive the demand of VAV box

8.3.2 SAUDI ARABIA

8.3.2.1 Growing residential and commercial infrastructure will create a huge impact on the VAV box market

8.3.3 NIGERIA

8.3.3.1 Government efforts on developing the country's infrastructure will lead to the demand for VAV box

8.3.4 REST OF MIDDLE EAST & AFRICA

8.4 APAC

8.4.1 CHINA

8.4.1.1 Growing HVAC market to drive the demand for VAV box

8.4.2 JAPAN

8.4.2.1 Increasing commercial, industrial, and hospitality construction to drive the VAV box market

8.4.3 INDIA

8.4.3.1 The rapidly growing construction industry is expected to drive VAV box demand

8.4.4 SOUTH KOREA

8.4.4.1 Commercial building is estimated to dominate the VAV box market in South Korea

8.4.5 INDONESIA

8.4.5.1 Infrastructure initiatives by the Indonesian government to drive the VAV box demand in the country

8.4.6 REST OF APAC

8.5 EUROPE

8.5.1 GERMANY

8.5.1.1 Growing industrial construction is expected to drive the VAV box market

8.5.2 UK

8.5.2.1 The presence of strong commercial real estate will drive the VAV box market

8.5.3 FRANCE

8.5.3.1 Growing construction and hospitality industry to drive the VAV box market

8.5.4 RUSSIA

8.5.4.1 Growth of overall construction industry will drive the VAV box market in the country

8.5.5 TURKEY

8.5.5.1 Growth in the construction of office buildings to drive the VAV box market

8.5.6 REST OF EUROPE

8.6 SOUTH AMERICA

8.6.1 BRAZIL

8.6.1.1 Promotion of energy-efficient systems in the country will lead to the demand of VAV box and systems

8.6.2 ARGENTINA

8.6.2.1 Increased government intervention and aid of IMF to promote the construction industry in the country

8.6.3 REST OF SOUTH AMERICA
