Abstracts

The global video surveillance market is expected to be valued at USD 53.7 billion in 2023 and is projected to reach USD 83.3 billion by 2028; it is expected to grow at a CAGR of 9.2% from 2023 to 2028. The video surveillance market is witnessing significant growth propelled by advancements in camera capabilities. Modern video cameras, including 4K IP cameras, offer substantially improved resolution, enabling the capture of finer details and clearer images even upon magnification. These enhanced cameras feature variable zoom lenses for a closer field of view and some incorporate built-in video surveillances for audio streaming and recording during video recording. Manufacturers are also focusing on improving low-light performance, while innovations like internal heating for cold environments and motion sensors further expand their usability. Companies are prioritizing cybersecurity measures to enhance camera systems' integrity. These advancements, combined with maturing technology and tailored systems, empower integrators to cater to increasing demand for upgraded surveillance solutions that meet evolving security and operational needs.

“Hybrid surveillance systems segment to account for the second largest CAGR for video surveillance market”

Hybrid surveillance systems that consist of integration of analog and IP cameras, exhibit second-highest CAGR in video surveillance market due to their unique advantages.

These systems offer businesses the ability to optimize existing analog infrastructure while gradually transitioning to more advanced IP technology, presenting a flexible and cost-effective solution for enhancing their surveillance capabilities. This versatility enables cost savings by using analog cameras in less critical areas, while employing high-resolution IP cameras in pivotal locations such as entrances and cash registers. The hybrid approach aligns with the diverse security needs of businesses, contributing to the robust growth of hybrid surveillance systems in the market.

“Commercial vertical to account for second highest CAGR of video surveillance market.”

The commercial vertical is holds for the second-highest CAGR within the video surveillance market due increasing security concerns across industries, such as in enterprises, retail, and banking, that drives substantial investments in advanced surveillance solutions. Integration with AI-powered analytics amplifies security efficacy, while real-time monitoring and remote accessibility align with evolving business needs. Mitigation of risks such as theft and vandalism further fuels demand, and regulatory compliance mandates reinforce the adoption of robust surveillance systems in commercial settings, collectively propelling the vertical's significant growth.

“North America to have the highest market share for video surveillance market.”

North America holds the second-largest market share in the video surveillance market is driven by several pivotal factors including robust technological infrastructure inherently facilitates the uptake of advanced surveillance solutions. Rising security concerns across sectors like government, retail, and healthcare propel the demand for comprehensive video surveillance systems. The integration of video analytics, AI, and cloud technologies augments surveillance capabilities, aligning with evolving security needs. Furthermore, North America's active participation in smart city initiatives bolsters its market prominence, while regulatory mandates for heightened security measures and compliance further fuel the adoption of advanced surveillance solutions.

The study contains insights from various industry experts, ranging from component suppliers to Tier 1 companies and OEMs. The break-up of the primaries is as follows:

By Company Type: Tier 1 – 40%, Tier 2 – 25%, and Tier 3 – 35%

By Designation: C-level Executives – 35%, Directors – 40%, and Others – 25%

By Region: North America – 35%, Europe – 20%, Asia Pacific – 30%, RoW – 15%

The key players operating in the video surveillance market are Hangzhou Hikvision Digital Technology Co., Ltd. (China), Zhejiang Dahua Technology Co., Ltd. (China), Axis Communications AB (Sweden), Bosch Security Systems, LLC (Germany), and Zhejiang Uniview Technologies Co.,Ltd. (China).

Research Coverage:

The research reports the Video Surveillance Market, By Offering (Hardware, Software, Service), System (IP Video Surveillance Systems, Analog Video Surveillance Systems, Hybrid Video Surveillance Systems), Vertical (Commercial, Infrastructure, Military & Defense, Residential, Public Facility, Industrial), and Region (North America, Europe, Asia Pacific, and RoW). The scope of the report covers detailed information regarding the major factors, such as drivers, restraints, challenges, and opportunities, influencing the growth of the video surveillance market. A detailed analysis of the key industry players has been done to provide insights into their business overviews, products, key strategies, Contracts, partnerships, and agreements. New product & service launches, mergers and acquisitions, and recent developments associated with the video surveillance market. Competitive analysis of upcoming startups in the video surveillance market ecosystem is covered in this report.

Key Benefits of Buying the Report

Analysis of key drivers (Advancement in hardware technologies, Deployment of AI-driven video analytics algorithms, Low initial investments in VSaaS, Popularity of deep learning and computer vision technologies), restraints (Video data privacy and security concerns, Lack of standardized guidelines and protocols), opportunities (Integration of surveillance systems with IoT and other emerging technologies, Adoption of smart devices for remote monitoring, Integration of access control features into surveillance systems), and challenges (Need for high-capacity storage systems and increased bandwidth, Interoperability issues between diverse camera systems) influencing the growth of the video surveillance market.

Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product launches in the video

surveillance market

Market Development: Comprehensive information about lucrative markets – the report analyses the video surveillance market across varied regions.

Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the video surveillance market

Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players like Hangzhou Hikvision Digital Technology Co., Ltd. (China), Zhejiang Dahua Technology Co., Ltd. (China), Axis Communications AB (Sweden), Bosch Security Systems, LLC (Germany), and Zhejiang Uniview Technologies Co.,Ltd. (China), among others in the video surveillance market.

7.2.2.1.1.1 Use of cost-effective surveillance monitors in control rooms to fuel market growth

7.2.2.1.2 More than 20 inches

7.2.2.1.2.1 Adoption of surveillance solutions with larger displays to accelerate segmental growth

7.2.3 STORAGE DEVICES

7.2.3.1 Storage devices, by type

7.2.3.1.1 Digital video recorders (DVRs)

7.2.3.1.1.1 Deployment of DVRs as cost-effective solutions in analog cameras to accelerate market growth

7.2.3.1.2 Network video recorders

7.2.3.1.2.1 Use of network video recorders in surveillance tools due to ease of deployment and flexibility to fuel segmental growth

7.2.3.1.3 Hybrid video recorders

7.2.3.1.3.1 Adoption of hybrid video recorders to accommodate analog and IP technologies to contribute to market growth

7.2.3.1.4 IP storage area networks

7.2.3.1.4.1 Employment of IP storage area networks as dedicated and high-performance storage systems to drive market

7.2.3.1.5 Direct-attached storage devices

7.2.3.1.5.1 Utilization of direct-attached storage devices in small-scale businesses to boost segmental growth

7.2.3.1.6 Network-attached storage devices

7.2.3.1.6.1 Extensive use of network-attached storage devices due to low costs to support market growth

7.2.4 ACCESSORIES

7.2.4.1 Cables

7.2.4.1.1 Ability of cables to establish physical connections between cameras and recording devices to boost demand

7.2.4.2 Encoders

7.2.4.2.1 Capability to integrate analog CCTV systems with network camera systems to contribute to segmental growth

7.3 SOFTWARE

TABLE 56 AI-DRIVEN VIDEO ANALYTICS: VIDEO SURVEILLANCE MARKET, BY TYPE, 2023–2028 (USD MILLION)

7.3.1.2.2.1 Edge Analytics

7.3.1.2.2.1.1 Rising popularity of edge computing and video analytics to contribute to segmental growth

7.3.1.2.2.2 Server Analytics

7.3.1.2.2.2.1 Increasing need for scalable analytics solutions to drive segmental growth

7.3.1.2.3 AI-driven video analytics, by use case

7.3.1.2.3.1 Gun detection

7.3.1.2.3.1.1 Adoption of gun detection solutions to prevent school violence to fuel segmental growth

7.3.1.2.3.2 Industrial temperature monitoring

7.3.1.2.3.2.1 Use of AI-based systems to improve industrial temperature monitoring to boost demand

7.3.1.2.3.3 Anomaly detection & behavior recognition

7.3.1.2.3.3.1 Deployment of surveillance cameras to address security needs in retail stores, sports venues, and airports to accelerate market growth

7.3.1.2.3.4 Facial recognition/person search

7.3.1.2.3.4.1 Utilization of surveillance systems to enhance airport security through facial recognition to drive market

7.3.1.2.3.5 Object detection & tracking

7.3.1.2.3.5.1 Implementation of AI-based object detection & tracking tools to monitor security breaches to contribute to segmental growth

7.3.1.2.3.6 Intrusion detection & perimeter protection

7.3.1.2.3.6.1 Adoption of intrusion detection & perimeter protection to provide close-up details to support market growth

7.3.1.2.3.7 Smoke & fire detection

7.3.1.2.3.7.1 Use of AI-based smoke & fire detection cameras in industrial applications to augment market growth

7.3.1.2.3.8 Traffic flow analysis & accident detection

7.3.1.2.3.8.1 Demand for traffic management & surveillance solutions to reduce accident rates to drive market

7.3.1.2.3.9 False alarm filtering

7.3.1.2.3.9.1 Use of false alarm filtration solutions to reduce burden on security personnel to propel market

7.3.1.2.3.10 Parking monitoring

7.3.1.2.3.10.1 Deployment of parking management solutions to enhance smart city efficiency and safety to fuel market growth

7.3.1.2.3.11 Vehicle identification & numberplate recognition

7.3.1.2.3.11.1 Adoption of AI-powered vehicle identification & number plate recognition to improve traffic analysis to accelerate segmental growth

7.3.2 SOFTWARE, BY DEPLOYMENT MODE

TABLE 57 SOFTWARE: VIDEO SURVEILLANCE MARKET, BY DEPLOYMENT MODE, 2019–2022 (USD BILLION)

TABLE 58 SOFTWARE: VIDEO SURVEILLANCE MARKET, BY DEPLOYMENT MODE, 2023–2028 (USD BILLION)

7.3.2.1 On-premises

7.3.2.1.1 Adoption of on-premises software to support analog and IP cameras on-site to propel market

7.3.2.2 Cloud-based

7.3.2.2.1 Use of cloud-based surveillance software in retail and residential sectors to boost market growth

7.4 SERVICES

12 APPENDIX

12.1 DISCUSSION GUIDE

12.2 KNOWLEDGESTORE: MARKETSANDMARKETS' SUBSCRIPTION PORTAL

12.3 CUSTOMIZATION OPTIONS

12.4 RELATED REPORTS

12.5 AUTHOR DETAILS

About

According to the research report "Video Surveillance Market by System (Analog, & IP), Offering (Hardware, Software, & Service), Vertical (Commercial, Infrastructure, Military & Defense, Residential, Public Facility, & Industrial), and Geography - Global Forecast to 2023", the video surveillance market, the overall market is estimated to grow from USD 36.89 Billion in 2018 to USD 68.34 Billion by 2023, at a CAGR of 13.1% between 2018 and 2023. The increasing concerns for public safety and security, growing adoption of IP cameras, and growing demand for DIY and spy cameras are the key factors driving the video surveillance market growth.

Major players in the video surveillance market are:

Hikvision (China),

Dahua (China),

Axis Communications (Sweden),

Bosch Security Systems (Germany),

FLIR (US),

Avigilon (Canada),

Hanwha Techwin (South Korea),

Honeywell Security Group (US),

Infinova (US),

Pelco (US),

BCD Video (US),

CP Plus (India),

Nice Systems (Israel),

Panasonic (Japan),

Tiandy (China),

Uniview (China),

Vivotek (Taiwan), and

Zicom (India).

Market for IP video surveillance systems to grow at a higher CAGR during the forecast period

The growth of the IP video surveillance systems market is mainly due to the shifting preference from analog to IP systems. The key advantages of IP systems include enhanced image quality, high scalability, easy installation, and remote accessibility with network-based models. These systems can be integrated with the existing IP network, and they provide the basic platform for software such as video analytics, VMS, and cloud storage. The market for IP video surveillance systems is expected to grow at a rapid pace in the near future owing to technological advancements in IP cameras as well as in the storage device industry.

Cameras expected to account for the largest size of the video surveillance hardware market by 2018

The growth in safety and security concerns, the rise in the crime rate, and the increase in the number of terror attacks are some major factors driving the growth of the market for cameras used for video surveillance. The continuous decrease in the prices of cameras has resulted in the increased adoption of surveillance cameras across the world, which, in turn, created the significant demand for storage solutions and monitors.

Commercial vertical to dominate the video surveillance market during the forecast period

The commercial vertical is expected to dominate the video surveillance market. Under this vertical, commercial areas such as enterprises and data centers, banking and finance buildings, hospitality centers, retail stores and malls, and warehouses are

considered. The rising demand for video surveillance systems in retail stores and malls, enterprise and data centers, and banking sectors is driving the growth of this market.

APAC to dominate the video surveillance market during the forecast period

Asia Pacific is the fastest-growing region in the video surveillance market owing to heavy investments in building new and improve existing infrastructure. The market for video surveillance systems and services in Asia Pacific is likely to continue to grow significantly at a high rate in the near future. The use of security cameras is expected to increase in APAC countries as these are emerging economies with a growing number of manufacturing bases, and the terrorist attack is a strong possibility. Moreover, the market for video surveillance is expected to witness an upsurge in APAC owing to the increased security concerns in APAC countries such as India and China.
