Abstracts

According to MarketsandMarkets, the wheat protein market is projected to reach USD 3.2 billion by 2028 from USD 2.5 billion by 2023, at a CAGR of 4.9% during the forecast period in terms of value. Wheat protein products are gaining attention, and consumers are more inclined toward adding more plant-based foods to their diets by including food products that contain wheat, gluten, and other proteins as alternative sources to animal-sourced products. The factors responsible for the growth of the wheat protein industry are the increase in lactose-intolerant consumers, health concerns, evolving protein source preferences, and a thriving food-processing sector that is introducing a wide variety of plant-based food & beverage products.

'By application, Bakery & Snacks is projected in high demand during the forecast period.'

Wheat gluten is used in the bakery industry. It is used in bakery products such as pasta, bread, and pastries. Its viscoelastic properties improve the dough's strength, while its water absorption capacity enables improvised product yield, softness, and shelf-life of baked products. In Europe, the rise in the aging population and growing health concerns have compelled consumers to opt for healthier alternatives such as value-added baked goods. Increasing disposable incomes and higher living standards have boosted the demand for bakery products in Europe. Bread and biscuits are the most consumed products; however, the demand for other bakery items, such as cakes, pastries, and cookies, is also increasing. Kr?ner-St?rke, a German-based company, provides vital

wheat gluten, which finds application in bakery products. Furthermore, a well-known company, Kellogg's, provides wheat protein-based snacks such as Pop-Tarts are a popular toaster pastry that typically contains wheat protein. Nestle also provides such as Nestle Crunch and Toll House Cookies. The bakery sector in the wheat protein market witnesses a paradigm shift in consumer interest toward health-enriching and functional foods.

'By form, Dry wheat protein to dominate the market during the forecast period.'

The dry form of wheat proteins is preferred among manufacturers of the food & beverage industry due to several benefits. Wheat proteins in the dry form are characterized by better stability and, ease of handling & better storage conditions compared to the liquid form.

'By region, Asia Pacific to drive market growth during the forecast period.'

Wheat proteins are highly cost-effective as compared to other proteins and find applications in various food industries, mainly bakeries. Bakery products account for a significant share of the food processing industry, and their consumption continues to rise due to the growing population, rising awareness, and increasing urbanization. The overall investment level in Asia and the Pacific regions has increased substantially over the past decade, especially in China, which contributes to rapid economic growth. The region hosts a strong agricultural production base, which is a key factor in producing plant-based protein sources.

Break-up of Primaries:

By Value Chain Side: Demand Side-41%, Supply Side-59%

By Designation: CXOs-31%, Managers – 24%, and Executives- 45%

By Region: Europe - 25%, Asia Pacific – 15%, North America - 45%, RoW – 5%, South America-10%

Leading players profiled in this report:

ADM (US)

Cargill, Incorporated (US)

Tereos (France), S&Dzucker AG (US)

MGP Ingredients (US)

Roquette Frères (France)

Glico Nutrition Foods Co., Ltd. (Japan)

Kerry Group PLC (Ireland)

Manildra Group (Australia)

Kröner-Stärke (Germany)

Crespel & Deiters Group (Germany)

Batory Foods (US)

Agridient B.V. (Netherlands)

Tate & Lyle (UK), and The Scoular Company (US)

The study includes an in-depth competitive analysis of these key players in the Wheat Protein market with their company profiles, recent developments, and key market strategies.

Research Coverage:

The report segments the wheat protein market on the basis on application, form, product type, concentration and region. In terms of insights, this report has focused on various levels of analyses—the competitive landscape, end-use analysis, and company profiles, which together comprise and discuss views on the emerging & high-growth segments of the global wheat protein market, high-growth regions, countries, government initiatives, drivers, restraints, opportunities, and challenges.

Reasons to buy this report:

Wheat Protein Market by Product (Gluten, Protein Isolate, Textured Protein, Hydrolyzed Protein), Form, Concent...

To get a comprehensive overview of the wheat protein market.

To gain wide-ranging information about the top players in this industry, their product portfolios, and key strategies adopted by them.

To gain insights about the major countries/regions in which the wheat protein market is flourishing.

(BILLION)

5.2.2 INCREASED INCIDENCE OF TYPE-2 DIABETES TO INCREASE CONSUMPTION OF PLANT-BASED PROTEIN DIETS

FIGURE 25 DIABETES WORLDWIDE IN 2021

5.3 MARKET DYNAMICS

FIGURE 26 WHEAT PROTEIN MARKET DYNAMICS

5.3.1 DRIVERS

5.3.1.1 Increase in consumer preference for meat analogs

5.3.1.2 Growth in applications of wheat protein in varied end-user industries

5.3.1.3 Growing popularity of protein-rich food products

5.3.1.4 Rise in lactose intolerance boosted use of wheat protein as dairy alternative

FIGURE 27 ESTIMATED PREVALENCE OF LACTOSE MALABSORPTION (%), BY
COUNTRY, 2022

5.3.2 RESTRAINTS

5.3.2.1 Increase in discussion on gluten intolerance and gluten-free diets

FIGURE 28 US: REASON TO ADOPT GLUTEN-FREE DIET

5.3.2.2 Ban on plant proteins and wheat of GM origin

5.3.3 OPPORTUNITIES

5.3.3.1 Growing role of wheat protein in pet food industry

5.3.4 CHALLENGES

5.3.4.1 Limited technological developments

5.3.4.2 Low consumer awareness about non-soy proteins

6 INDUSTRY TRENDS

6.1 INTRODUCTION

6.2 VALUE CHAIN ANALYSIS

6.2.1 RESEARCH & DEVELOPMENT AND RAW MATERIAL SOURCING
