“Zinc chemicals market to grow at a CAGR of 5.5% (2017-2022)”

The global zinc chemicals market is projected to reach USD 10.41 billion by 2022, at a CAGR of 5.5% between 2017 and 2022. Rapid increasing demand for zinc chemicals in the agriculture and glass & ceramics industries and rapid growth of the automotive industry in Asia Pacific are driving the growth of the global zinc chemicals market.

“Rubber compounding is expected to be the largest application segment during the forecast period”

Rubber compounding is estimated to be the largest application segment in the global zinc chemicals market during the forecast period, in terms of value and volume. In rubber compounding application, zinc chemicals are used to manufacture rubber chemicals. Zinc chemical such as zinc oxide is used in commercial production of rubber; also zinc oxide and stearic acid are together used to accelerate its curing process. Zinc chemicals are used to produce radial tires, bias tires, conveyor belts, hose, rubber belt, rubber shoes, and latex gloves. Hence, the growth of the automotive industry is driving the rubber compounding segment.

“Asia Pacific expected to be the largest and fastest-growing market for zinc chemicals”

Asia Pacific is projected to be the largest as well as the fastest-growing market for zinc chemicals during the forecast period. The high demand for zinc chemicals from countries, such as China, Japan, South Korea, and India is driving the market in this region. The growth of prominent industries such as agriculture, plastics, rubber compounding, and manufacturing has increased the demand for zinc chemicals in this region.
