## Abstracts

In this UK access control market research report MBD have studied the access control sector in private commercial applications and public non-residential applications together with use in retail, domestic, industrial and financial sectors. Major applications include hotels, offices and health establishments. The report analyses various types of equipment, some of which are integrated with other installations such as CCTV, intruder and fire alarm systems.

This updated report identifies the industry structure, market development, size, segmentation, production, international trade and end use etc in an easily readable format, analysing five year historical data together with five year forecasts.

The market value of access control is segmented into on-line, audio/video entry and stand alone equipment. The segmentation identifies the long-term trend towards online equipment. The report also identifies the number of asset control installations by NSI approved installers. This data is further broken down by UK area and police authority.

Five year forecasts are provided for the UK security alarms & systems market, UK construction output, and the UK market for access control, including a breakdown into stand alone, audio/video entry and on-line equipment.

All market values in the report are stated at enduser prices and include sales, rental income, installation and maintenance costs.
