Abstracts

The UK business computing market research report analyses the market size, trends and industry structure. With five year historical data, and a detailed five year forecast, all data and trends are fully explained throughout the report.

The market is segmented into professional services, operational services, systems/solutions and maintenance/support. A further segmentation is provided by type of work, i.e. project and contract work.

An overview of a number of industry players is also provided, including a five year financial analysis as well as a set of key financial ratios. The report does not attempt to provide a comprehensive list of the leading companies, but reviews a representative sample of the different types of companies operating in the sector in order to provide benchmarking opportunities of relevance to a variety of readers.

The report is updated to combine the up-to-date development and trends with the latest data available on the business computing market in the UK.
