## Abstracts

Market report and industry analysis of the UK dental provider market covering both the NHS and the private sector. Major changes are taking place in the provision of dental care, and legislative impacts are pronounced. The report considers the market size and segmentation over the past five years and looks to projections for the next five years.

Expenditure on the private sector is segmented into self pay and dental plans, while expenditure on NHS dentistry is segmented into NHS expenditure and patient self-pay. Market segmentation figures are provided both for a five year historical review period as well as a five year forecast period.

The UK dentistry market research report also provides an overview of a number of corporate dental practices as well as dental schemes providers, including a five year financial analysis as well as a set of key financial ratios. The report does not attempt to provide a comprehensive list of the leading companies, but reviews a representative sample of the different types of companies operating in the sector in order to provide benchmarking opportunities of relevance to a variety of readers.
