About

The report brings to your attention profound analysis of iron ore market in North Korea. Historical, present and future trends are covered. Experts' opinions and estimations are provided.

the North Korean economy depends heavily on anthracite, coal and iron ore exports

North Korea has large-scale iron ore mines; iron ore resources are located in the provinces of Pyongan-do, Hamgyeong-do and Hwanghae-do

iron ore is consumed locally mainly in the production of steel (98% of total consumption)

almost all North Korean mines suffer from a lack of electricity and proper equipment, mine operation rates are low

foreign investments are necessary to improve the situation in the iron industry but they are not likely to happen in the near future due to the politics

China will continue to be the main partner and driver of overall North Korean market development
